Compliance Assessment Report

NorthLink WA Perth-Darwin National Highway (Swan Valley Section)

1 Introduction

This Compliance Assessment Report (CAR) has been prepared to document compliance with Ministerial Statements No. 1036 (MS 1036) and No. 1116 (MS 1116) issued for implementation of the Perth-Darwin National Highway (Swan Valley Section) under the *Environmental Protection Act 1986* (EP Act). The CAR has been prepared in accordance with Condition 4-6 of MS 1036, as well as the Office of the Environmental Protection Authority (OEPA) Post Assessment Guideline No. 3 – *Post Assessment Guideline for Preparing a Compliance Assessment Report* (OEPA 2012a).

1.1 Project background

The Commissioner for Main Roads Western Australia (MRWA) is the proponent for the Perth-Darwin National Highway (Swan Valley Section; the project). The project is to construct and operate a 38 kilometre (km) dual carriageway highway from the intersection of Tonkin Highway and Reid Highway in Malaga that connects with the Great Northern Highway and Brand Highway in Muchea (**Plate 1**). The project has been constructed in two stages – namely the Central section and Northern section.

The Central section involved construction south of Maralla Road (approximately 17.5 km) and the Northern section involved construction from Maralla Road north to Muchea (approximately 20.5 km). Construction on these main sections commenced in May and September 2017 respectively. It is noted that a small area of construction also occurred near Maralla Road in March 2017 as a separate activity to the Central and Northern sections. Construction was completed on 21 April 2020.

The project was approved to be implemented, subject to conditions, under the EP Act on 23 September 2016 (MS 1036). Since this time, the following four changes have been made:

1. On 24 November 2016, a s46 clerical mistake/unintentional error change was made regarding Condition 12-3 such that the Fauna-Construction Condition Environmental Management Plan shall include management actions rather than threshold contingency actions.
2. On 7 June 2017, a s45C change to the proposal was made, specifically:
 - a. Alteration of the development envelope to allow for the construction of additional minor roads and driveways.
 - b. Increase in the development envelope by 19.07 ha from 985 ha to 1,004.07 ha.
 - c. Up to 0.34 ha of native vegetation will be cleared in the additional areas of the development envelope.
3. On 7 November 2017, a change to Condition 16-20 was approved under s46C and included the deletion of Condition 16-20 and replacement with alternate text.
4. On 4 December 2018, a request under s46 was made to remove reference to the Claypans of the Swan Coastal Plain and remove the requirement to vest land with the Conservation and Parks Commission. The EPA report for this Section 46 inquiry was released on 8 October 2019 and a new Ministerial Statement (MS 1116) was released on 20 November 2019 which deleted and replaced Conditions 10, 14 and 16 of MS 1036.

Compliance Assessment Report

NorthLink WA Perth-Darwin National Highway (Swan Valley Section)

1.2 Purpose and scope

This CAR documents compliance with conditions in MS 1036 and MS 1116 for the period 20 September 2022 to 19 September 2023, in accordance with Condition 4-6 of MS 1036 which states:

The proponent shall submit to the CEO the first Compliance Assessment Report fifteen (15) months from the date of issue of this Statement addressing the twelve (12) month period from the date of issue of this Statement and then annually from the date of submission of the first Compliance Assessment Report, or as otherwise agreed in writing by the CEO.

The Compliance Assessment Report shall:

- *be endorsed by the proponent's Chief Executive Office or a person delegated to sign on the Chief Executive Officer's behalf;*
- *include a statement as to whether the proponent has complied with the conditions;*
- *identify potential non-compliances and describe corrective and preventative actions taken;*
- *be made publicly available in accordance with the approved Compliance Assessment Plan; and*
- *indicate any proposed changes to the Compliance Assessment Plan required by condition 4-1.*

This CAR documents compliance with condition environmental outcomes and condition environmental objectives identified in MS 1036, MS 1116 and the Condition Environmental Management Plans (Condition EMPs).

1.3 Compliance Assessment Plan

This CAR has been developed in accordance with the Compliance Assessment Plan (CAP) (ELA 2018) which was revised and subsequently approved by Department of Water and Environmental Regulation (DWER) on 7 February 2019. The revised and approved CAP is publicly available on the Main Roads website (MRWA 2023).

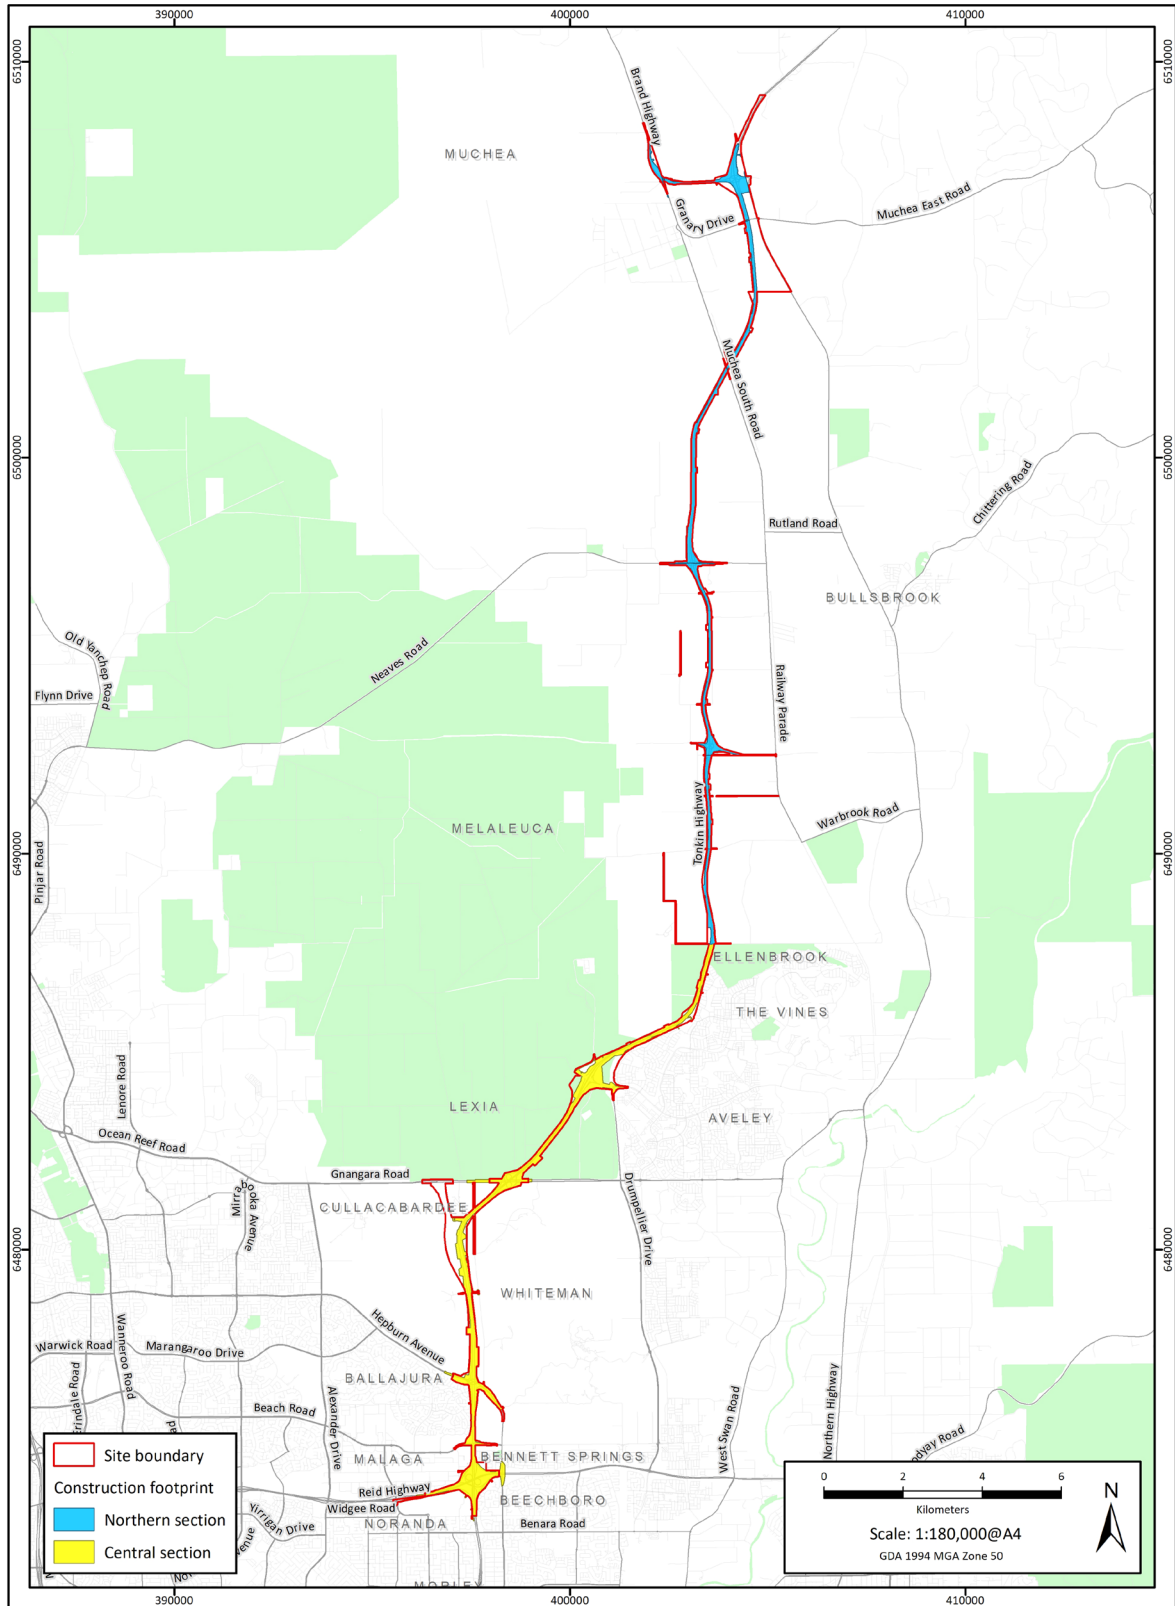

Plate 1: Project Location

Compliance Assessment Report

NorthLink WA Perth-Darwin National Highway (Swan Valley Section)

2 Summary of Implementation Status

Main Roads has completed the construction phase of the project, which is now fully operational and in the post-construction phase. For the reporting period of this CAR (20 September 2022 to 19 September 2023), all components of the project were in the post-construction and operational phases.

Compliance Assessment Report

3 Statement of Compliance

3.1 Proposal and proponent details

Proposal Title	Perth to Darwin National Highway (Swan Valley Section)
Statement Number	Ministerial Statements No. 1036 and No. 1116
Proponent Name	Commissioner for Main Roads Western Australia
Proponent's Australian Company Number (where relevant)	50 860 676 021

3.2 Statement of compliance details

Reporting Period	20/09/2022 to 19/09/2023
-------------------------	--------------------------

Implementation phase(s) during reporting period (please ✓ relevant phase(s))							
Pre-construction		Construction		Operation	✓	Decommissioning	

Audit table for Statement addressed in this Statement of Compliance is provided at Attachment:	Appendix B
---	------------

An audit table for the Statement addressed in this Statement of Compliance must be provided as Attachment 2 to this Statement of Compliance. The audit table must be prepared and maintained in accordance with the Department of Water and Environmental Regulation (DWER) *Post Assessment Guideline for Preparing an Audit Table*, as amended from time to time. The 'Status Column' of the audit table must accurately describe the compliance status of each implementation condition and/or procedure for the reporting period of this Statement of Compliance. The terms that may be used by the proponent in the 'Status Column' of the audit table are limited to the Compliance Status Terms listed and defined in Table 1 of Attachment 1.

Were all implementation conditions and/or procedures of the Statement complied with within the reporting period?			
No (please proceed to Section 3)	✓	Yes (please proceed to Section 4)	

Each page (including Attachment 2) must be initialled by the person who signs **Section 3.4** of this Statement of Compliance.

INITIALS:

L

Compliance Assessment Report

NorthLink WA Perth-Darwin National Highway (Swan Valley Section)

3.3 Details of non-compliance(s) and/or potential non-compliance(s)

The information required in **Section 3.3** must be provided for each non-compliance or potential non-compliance identified during the reporting period covered by this Statement of Compliance.

Non-compliance/potential non-compliance

Which implementation condition or procedure was non-compliant or potentially non-compliant?

11-1 of MS1036

Was the implementation condition or procedure non-compliance or potentially non-compliance?

Non-compliance

On what date(s) did the non-compliance or potential on-compliance occur (if applicable)?

The non-compliance relates to not achieving the revegetation completion criteria within 3 years of the commencement (August 2019) of revegetation.

Was this non-compliance or potential non-compliance reported to the Chief Executive Officer, DWER?

X Yes	<input type="checkbox"/> Reported to DWER verbally	Date	<input type="checkbox"/> No
	X Reported to DWER in writing	Date 18/11/2022	

What are the details of the non-compliance or potential non-compliance and where relevant, the extent of and impacts associated with the non-compliance or potential non-compliance?

Condition 11-1 of MS 1036 states the proponent shall manage the implementation of the proposal to meet the following environmental objectives:

- To progressively rehabilitate the areas of native vegetation cleared as a result of implementation of the proposal that are no longer required for construction activities or not required for ongoing operations and;
- To rehabilitate the section of Beechboro Road North from Jules Steiner Memorial Drive to Gngara Road within twelve months of decommissioning this section of road.

Objective one is achieved as no applicable areas were temporarily cleared and required progressive rehabilitation.

Objective two relates to this potential non-compliance. The *Condition Environmental Management Plan – Flora and Vegetation – Progressive Rehabilitation* sets out the requirements for rehabilitation of Beechboro Road North, including the two management targets required to achieve the environmental objective.

Main Roads commenced rehabilitation of the redundant section of Beechboro Road North in August 2019 (within 12 months of decommissioning), with practical completion of revegetation works achieved in late 2019. This achieved the requirements of management target 1.

Management target 2 requires the rehabilitation site to meet the completion criteria after 3 years (i.e. by August 2022). Ecoscape undertook post-revegetation monitoring in summer 2022 (3rd year of monitoring), which determined that 2 of 7 completion criteria had been met. Given 5 completion criteria (criteria 1-5), had not been met after three years, management target 2 has not been achieved. As such, condition environmental objective 11-1(2) has not been met.

What is the precise location where the non-compliance or potential non-compliance occurred (if applicable)? (Please provide this information as a map or GIS co-ordinates).

The Beechboro Road North revegetation site, as shown in Plate 2.

What was the cause(s) of the non-compliance or potential non-compliance?

The failure to achieve the management target is due to difficult site conditions, which includes poor seed germination within in-situ soils, extreme heat in summer of 2021/2022 and heavy predation by local fauna. The ongoing lack of success at this site is largely due to predation by kangaroos and to a lesser extent by rabbits.

Compliance Assessment Report

NorthLink WA Perth-Darwin National Highway (Swan Valley Section)

What remedial and/or corrective action(s), if any, were taken or are proposed to be taken in response to the non-compliance or potential non-compliance?

Main Roads implemented a range of additional rehabilitation management actions with the aim of achieving the remaining completion criteria, such that management target 2 can be met. This has included installing 435m of fauna exclusion fencing and an additional 5,776 infill plants in July 2022 as a trial to see if this protects planting from predation. (E-001) (R22-003)

The steps taken are consistent with the proposed adaptive management protocols outlined in the CEMP, and as such the non-compliance solely relates to not achieving the completion criteria within the nominated 3 year timeframe.

Main Roads will continue to monitor the effectiveness of the fencing trial in deterring predation by kangaroos and rabbits. If the trial is successful in deterring predation, then more areas of the Beechboro Road North revegetation area will be fenced and/or planted in 2024. As such it is unlikely the revegetation will approach the remaining completion criteria for a number of years.

What measures, if any, were in place to prevent the non-compliance or potential non-compliance before it occurred? What, if any, amendments have been made to those measures to prevent re-occurrence?

The CEMP Flora and Vegetation – Progressive Rehabilitation (2018) details the completion criteria to meet the management targets of density and cover of rehabilitation. Amendments to the target completion percentages may be required to account for the site and contributing factors to low seedling survival. This may include broadening the range of species approved to plant and reducing the diversity whilst increasing the rehabilitation success using species able to survive in the soil type, climatic conditions and that are less prone to predation.

Please provide information/documentation collected and recorded in relation to this implementation condition or procedure:

- In the reporting period addressed in this Statement of Compliance; and
- As outlined in the approved Compliance Assessment Plan for the Statement addressed in this Statement of Compliance. (the above information may be provided as an attachment to this Statement of Compliance.

- R22_14_Revegetation monitoring July 22
- R22_003_Handover report defects and liability period September 2022
- L22_010_MS1036 Report to CEO condition 7-4 181122

3.4 Proponent declaration

I, Geoff Xanthis, Project Director, Office of Major Transport Infrastructure Delivery

declare that I am authorised on behalf of Main Roads Western Australia

(being the person responsible for the proposal) to submit this form and that the information contained in this form is true and not misleading.

Signature:  Date: 19/12/2023

Please note that:

- It is an offence under section 112 of the *Environmental Protection Act 1986* for a person to give or cause to be given information that to his knowledge is false or misleading in a material particular; and
- The Chief Executive Officer of the DWER has powers under section 47(2) of the *Environmental Protection Act 1986* to require reports and information about implementation of the proposal to which the statement relates and compliance with the implementation conditions.

3.5 Submission of statement of compliance

One hard copy and one electronic copy (preferably PDF on CD or thumb drive) of the Statement of Compliance are required to be submitted to the Chief Executive Officer, DWER, marked to the attention of Manager, Compliance (Ministerial Statements).

Please note, the DWER has adopted a procedure of providing written acknowledgment of receipt of all Statements of Compliance submitted by the proponent, however, the DWER does not approve Statements of Compliance.

3.6 Contact information

Queries regarding Statements of Compliance, or other issues of compliance relevant to a Statement may be directed to Compliance (Ministerial Statements), DWER:

Manager, Compliance (Ministerial Statements)

Department of Water and Environmental Regulation

Postal Address: Locked Bag 10
Joondalup DC
WA 6919

Phone: (08) 6364 7000

3.7 Post assessment guidelines and forms

Post assessment documents can be found at www.epa.wa.gov.au

Compliance Assessment Report

NorthLink WA Perth-Darwin National Highway (Swan Valley Section)

3.8 Statement of compliance - Attachment 1

Compliance status terms are provided in **Table 1**.

Table 1: Compliance Status Terms

Compliance Status Terms	Abbreviation	Definition	Notes
Compliant	C	Implementation of the proposal has been carried out in accordance with the requirements of the audit element.	This term applies to audit elements with: <ul style="list-style-type: none"> • Ongoing requirements that have been met during the reporting period; and • Requirements with a finite period of application that have been met during the reporting period, but whose status has not yet been classified as 'completed'.
Completed	CLD	A requirement with a finite period of application has been satisfactorily completed.	This term may only be used where: <ul style="list-style-type: none"> • Audit elements have a finite period of application (e.g. construction activities, development of a document); • The action has been satisfactorily completed; and • The DWER has provided written acceptance of a 'completed' status for the audit element.
Not required at this stage	NR	The requirements of the audit element were not triggered during the reporting period.	This should be consistent with the 'Phase' column of the audit table.
Potentially Non-Compliant	PNC	Possible or likely failure to meet the requirements of the audit element.	This term may apply where during the reporting period the proponent has identified a potential non-compliance and has not yet finalised its investigations to determine whether non-compliance has occurred.
Non-Compliant	NC	Implementation of the proposal has not been carried out in accordance with the requirements of the audit element.	This term applies where the requirements of the audit element are not "complete" have not been met during the reporting period.
In Process	IP	Where an audit element requires a management or monitoring plan be submitted to the DWER or another government agency for approval, that submission has been made and no further information or changes have been requested by the DWER or the other government agency and assessment by the DWER or other government agency for approval is still pending.	The term 'In Process' may not be used for any purpose other than that stated in the Definition Column. The term 'In Process' may not be used to describe the compliance status of an implementation condition and/or procedure that requires implementation throughout the life of the project (e.g. implementation of a management plan).

3.9 Statement of compliance - Attachment 2

An audit table for the Statement addressed in this Statement of Compliance must be provided as Attachment 2.

Compliance Assessment Report

NorthLink WA Perth-Darwin National Highway (Swan Valley Section)

The audit table is provided in **Appendix B**. The audit table has been prepared and maintained in accordance with the OEPA's *Post Assessment Guideline for Preparing an Audit Table* (OEPA 2012b). The 'Status Column' of the audit table accurately describes the compliance status of each implementation condition and/or procedure for the reporting period of this Statement of Compliance (20 September 2022 to 19 September 2023). The terms that have been used in the 'Status Column' of the audit table are limited to the Compliance Status Terms listed and defined in **Table 1** of **Attachment 1** above.

A handwritten signature in black ink, appearing to be the letter 'L' with a flourish.

Compliance Assessment Report

NorthLink WA Perth-Darwin National Highway (Swan Valley Section)

4 Details of Declared Compliance Status

4.1 Summary of compliance

Compliance with the Key Characteristics of the Proposal are provided in **Appendix A**.

Compliance with the conditions of MS 1036 and MS 1116 are outlined in the audit table provided in **Appendix B**, in accordance with the CAP and the DWER's Statement of Compliance.

In summary, there was one non-compliance with the conditions of MS 1036 and MS 1116.

4.2 Environmental management plans and offset strategies

The following management plans and/or offsets strategies are required to be implemented by MS 1036/MS 1116, have been approved by DWER, and were therefore in effect during this reporting period:

- Condition 9 (MS 1036): Flora and Vegetation – Construction Condition Environmental Management Plan (Rev 5, February 2019) (Coffey 2019c)
- Condition 10 (MS 1116): Flora and Vegetation – Indirect Impacts and Threatened Flora and Communities Condition Environmental Management Plan (Rev 5, January 2020) (Coffey 2020b)
- Condition 11 (MS 1036): Flora and Vegetation – Progressive Rehabilitation Condition Environmental Management Plan (Rev 4, August 2018) (Coffey 2018b)
- Condition 12 (MS 1036): Fauna – Construction Condition Environmental Management Plan (Rev 4, January 2019) (Coffey 2019b)
- Condition 13 (MS 1036): Inland Waters Environmental Quality – Hydrological Processes Condition Environmental Management Plan (Rev 7, January 2019) (Coffey 2019d)
- Condition 14 (MS 1116): Flora and Vegetation – Inland Waters Condition Environmental Management Plan (Rev 10, January 2020) (Coffey 2020a)
- Condition 15 (MS 1036): Amenity (Noise) Condition Environmental Management Plan (Rev 4, November 2018) (Coffey 2018a)
- Condition 16 (MS 1116): Ippolo Road Site Land Acquisition and Management Plan (Rev 2, January 2017) (Coffey 2017)
- Condition 16 (MS 1116): *Caladenia huegelii* Habitat Management Plan (Rev 5, January 2019) (Coffey 2019a)
- Condition 16 (MS 1116): Land Acquisition and Rehabilitation Offsets Strategy (Rev 3, December 2018) (Coffey 2018c)
- Condition 16 (MS 1116): SCP 20a Offsets Strategy (Rev 4, May 2019) (Coffey 2019e).

The most recent approved management plans and offsets strategies are publicly available on the Main Roads website (MRWA 2023).

The majority of the management plans are required to have their performance assessed for compliance against the MS conditions and reported in the CAR. The Condition EMPs are either management based (**Section 4.2.1**) or outcome based (**Section 4.2.2**).

Compliance Assessment Report

NorthLink WA Perth-Darwin National Highway (Swan Valley Section)

The Ippolo Road Site Land Acquisition and Management Plan and the *Caladenia huegelii* Habitat Management Plan are not Conditional EMPs and do not contain management targets. Assessment of compliance against these two plans is therefore limited to the implementation of the management activities in achieving the environmental objectives or outcomes. These two management plans are addressed separately in **Section 4.2.3**.

The Land Acquisition and Rehabilitation Offsets Strategy and SCP20a Offsets Strategy, whilst not management plans, are required to have their performance assessed for compliance against the MS Conditions and reported in the CAR. The offset strategies are addressed in **Section 4.2.3**.

A register of supporting evidence is provided in **Appendix C**. If required, further evidence can be provided upon request. This is discussed further in **Section 5**.

4.2.1 Condition EMPs (management based)

The following plans are management-based Condition EMPs:

- Flora and Vegetation – Construction Condition Environmental Management Plan (Condition 9)
- Flora and Vegetation – Indirect Impacts and Threatened Flora and Communities Condition Environmental Management Plan (Condition 10)
- Flora and Vegetation – Progressive Rehabilitation Condition Environmental Management Plan (Condition 11)
- Fauna – Construction Condition Environmental Management Plan (Condition 12)
- Amenity (Noise) – Condition Environmental Management Plan (Condition 15).

The management-based Condition EMPs have been assessed for compliance in achieving the environmental objectives (through assessment of whether relevant management targets are met), as well as being assessed for compliance with the MS conditions (**Table 2**).

For the 2023 CAR reporting period, the project is in the post-construction/operational phase and therefore the relevant elements of the Condition EMPs requiring assessment is limited to the post-construction monitoring requirements. Pre-construction or construction elements (management actions and monitoring) have been previously completed and assessed as part of previous CARs and therefore are not applicable to the 2023 CAR reporting period.

Compliance Assessment Report

NorthLink WA Perth-Darwin National Highway (Swan Valley Section)

Table 2: Status of compliance with Condition EMPs (management based)

Condition environmental objective or outcome set in the Condition EMP or in MS 1036/MS 1116	Reporting on the management objectives and management annually, commencing 12 months from date of issue	Status
Key environmental factor: Flora and Vegetation MS 1036, Conditions 9-1, 9-8 and 9-9 Condition EMP: Flora and Vegetation – Construction		
<p>Condition environmental objective 9-1(1) (MS 1036): To ensure that <i>Phytophthora cinnamomi</i> is not introduced into disease free areas by construction activities during construction.</p>	<p>In accordance with the CEMP, annual post-construction monitoring is required for a period of three years (L21-011). Terratree undertook dieback monitoring on 11 January 2023 (R23-17).</p> <p>In total, 21.4 ha of vegetation was assessed for the occurrence of dieback, with 4.5 ha of vegetation determined to be infested, 0.1 ha temporary uninterpretable due to a recent burn and 17 ha determined to be uninfested.</p> <p>Any spread of dieback compared to previous surveys was found to be due to the natural autonomous spread of the pathogen, probably as a result of root-to-root infection, rather than a result of construction activities. Therefore, no introduction of <i>Phytophthora cinnamomi</i> into disease-free areas by construction activities has occurred (R23-17). Relevant management target/s and associated environmental objective met for reporting period.</p>	Compliant MRWA has requested that this condition be considered completed.
<p>Condition environmental objective 9-1(2) (MS 1036): To ensure that impacts to flora and vegetation from dust are minimised as far as practicable during construction.</p>	<p>In accordance with the CEMP, annual post-construction monitoring is required for a period of three years (L21-011). Emerge Associates undertook monitoring in October and November 2022. The site was visited over multiple dates owing to the large number of quadrats present.</p> <p>No impact to, or loss of, flora or vegetation within the development envelope and adjacent environmentally sensitive areas was recorded that could be attributed to dust generated by construction activities. (R23-13).</p> <p>Relevant management target/s and associated environmental objective met for reporting period.</p>	Compliant MRWA has requested that this condition be considered completed.
<p>Condition environmental objective 9-1(3) (MS 1036): To ensure that impacts to flora and vegetation from the introduction or spread of weeds are minimised as far as practicable during construction.</p>	<p>In accordance with the CEMP, annual post-construction monitoring is required for a period of three years (L21-011). Emerge Associates undertook monitoring in October and November 2022. The site was visited over multiple dates owing to the large number of quadrats present.</p> <p>Survey of the edge of the development envelope during October and November 2022 did not record any declared weed species, consistent with previous monitoring. Therefore, no declared pests have been introduced into the development envelope or adjacent environmentally sensitive areas by construction activities (R23-13).</p> <p>Weed species and density recorded on the edge of the development envelope in October and November 2022 are similar to pre-construction data. No areas within the Northlink development envelope were reported to have been or are considered likely to have been weed free prior to construction (based on first year of monitoring in 2017/2018). Therefore, no weeds are considered to have been introduced or spread by construction activities into weed-free areas or adjacent environmentally sensitive areas (R23-13).</p>	Compliant MRWA has requested that this condition be considered Completed.

Compliance Assessment Report

NorthLink WA Perth-Darwin National Highway (Swan Valley Section)

Condition environmental objective or outcome set in the Condition EMP or in MS 1036/MS 1116	Reporting on the management objectives and management annually, commencing 12 months from date of issue	Status
	Relevant management target/s and associated environmental objective met for reporting period.	
<p>Condition 9-8 (MS 1036): The proponent shall not undertake clearing or construct any laydown areas or stockpiles within the 50 m buffer of <i>Caladenia huegelii</i>, as delineated in Figure 2 of Schedule 1 and defined by geographic coordinates in Schedule 2.</p>	<p>Condition 9-8 is primarily applicable during the construction period, with compliance reported on within the previous CARs. However, in accordance with the CEMP, annual post-construction monitoring is required for a period of three years (L21-011).</p> <p>Survey of the buffers by Emerge Associates for <i>Caladenia huegelii</i> during October and November 2022 did not record any disturbance caused within the past 12 months. This management target is no longer relevant now that construction of Northlink has been completed and disturbance activities have ceased (R23-13).</p>	Compliant MRWA has requested that this condition be considered Completed.
<p>Condition 9-9 (MS 1036): The proponent shall not undertake clearing or construct any laydown areas or stockpiles within the 10 m buffer, as delineated in figure 3 of Schedule 1 and defined by geographic coordinates in Schedule 2, of:</p> <ul style="list-style-type: none"> • <i>Grevillea curviloba</i> subsp. <i>incurva</i>; and • <i>Darwinia foetida</i> 	<p>Condition 9-9 is primarily applicable during the construction period, with compliance reported on within the previous CARs. However, in accordance with the CEMP, annual post-construction monitoring is required for a period of three years (L21-011).</p> <p>Survey of the buffers associated with <i>Grevillea curviloba</i> subsp. <i>incurva</i> and <i>Darwinia foetida</i> during October and November 2022 did not record any disturbance caused within the past 12 months. This management target is no longer relevant now that construction of Northlink has been completed and disturbance activities have ceased (R23-13).</p>	Compliant MRWA has requested that this condition be considered completed.
<p>Key environmental factor: Flora and Vegetation MS 1116, Conditions 10-1 and 10-2 Condition EMP: Flora and Vegetation – Indirect Impacts and Threatened Flora and Communities</p>		
<p>Condition environmental objective 10-1(1) (MS 1116): To ensure that indirect impacts, including but not limited to weeds, unauthorised access, increased fire risk and litter, changes to surface water regimes, to flora and vegetation, including but not limited to <i>Caladenia huegelii</i> habitat, <i>Grevillea curviloba</i> subsp. <i>incurva</i>, <i>Darwinia foetida</i>, Conservation Category Wetlands and Communities of Tumulus Springs (Organic Mound Springs, Swan Coastal Plain) are minimised as far as practicable.</p>	<p>Emerge Associates undertook the required post-construction monitoring in October/November 2021, January/February 2022, April 2022, July/August 2022 and October/November 2022.</p> <p>Supporting evidence demonstrating compliance with post-construction environmental objectives 10-1(1) of MS 1116 are as follows:</p> <ul style="list-style-type: none"> • No evidence of indirect impact from operation of the road to native cover, native species richness or weeds more than 10 m from the new edge of native vegetation adjacent to Communities of Tumulus Springs (Organic Mound Springs, Swan Coastal Plain) and Conservation Category Wetlands was recorded (R23-13). • No evidence of indirect from operation of the road impact to native cover, native species richness or weeds more than 10 m from the new edge of native vegetation in areas of <i>Caladenia huegelii</i> habitat (R23-13). • The two individuals of <i>Grevillea curviloba</i> subsp. <i>incurva</i> in the Brand Highway Road reserve at Muchea identified within the CEMP were maintained (R23-13). • The number of individuals of <i>Darwinia foetida</i> in the Great Northern Highway Road reserve at Muchea was maintained and in fact increased from 26 to 99 (R23-13). <p>In accordance with Section 4.3 of the CEMP, post-construction monitoring related to potential changes to surface water regimes was completed in accordance with the Flora and Vegetation – Inland Waters Environmental Quality – Hydrological Processes Condition Environmental Management Plan. This is discussed below in relation to condition environmental outcome 14-1(2). In summary, the</p>	Compliant MRWA has requested that this condition be considered completed.

Compliance Assessment Report

NorthLink WA Perth-Darwin National Highway (Swan Valley Section)

Condition environmental objective or outcome set in the Condition EMP or in MS 1036/MS 1116	Reporting on the management objectives and management annually, commencing 12 months from date of issue	Status
	<p>required monitoring was completed in August 2022 and no exceedance of the trigger or threshold criteria (ponding extending 6m/10m (respectively) or further from the project boundary over a two-day period) were observed (R23-16).</p> <p>Relevant management target/s and associated environmental objective met for reporting period.</p>	
<p>Condition environmental objective 10-1(2) (MS 1116): To maintain or improve the condition of the remaining extent of SCP 20a as shown in Figure 4 of Ministerial Statement 1036, through implementation of the Flora and Vegetation – Indirect Impacts and Threatened Flora and Communities – Condition Environmental Management Plan approved by the CEO.</p>	<p>Emerge Associates undertook the required post-construction monitoring in October/November 2021, January/February 2022, April 2022, July/August 2022 and October/November 2022 (R23-13).</p> <p>The monitoring determined that the condition of remaining extent of SCP20a as shown in Figure 4 of Ministerial Statement 1036 was maintained or improved (R23-13).</p> <p>Relevant management target/s and associated environmental objective met for reporting period.</p>	<p>Compliant MRWA has requested that this condition be considered completed.</p>
<p>Key environmental factor: Flora and Vegetation, MS 1036 Conditions 11-1 and 11-6 Condition EMP: Flora and Vegetation – Progressive Rehabilitation Condition Environmental Management Plan</p>		
<p>Condition environmental objective 11-1(1) (MS 1036): To progressively rehabilitate the area of native vegetation cleared as a result of implementation of the proposal that are no longer required for construction activities or not required for ongoing operations.</p>	<p>No areas of native vegetation within the development envelope were temporarily cleared and therefore no management actions are required in relation to Condition 11-1(1), as outlined in Section 2.3 of the CEMP. No clearing solely for temporary activities was conducted, therefore this environmental objective is met as described in the Flora and Vegetation – Progressive Rehabilitation CEMP.</p>	<p>Compliant</p>
<p>Condition environmental objective 11-1(2) (MS 1036): To rehabilitate the section of Beechboro Road North from Jules Steiner Memorial Drive to Gnangara Road within twelve months of decommissioning this section of road.</p>	<p>Main Roads commenced rehabilitation of the redundant section of Beechboro Road North in August 2019 (within 12 months of decommissioning), with practical completion of revegetation works achieved in late 2019. As such management target 1 has been achieved.</p> <p>Management target 2 requires the rehabilitation site to meet the completion criteria after 3 years (i.e. by August 2022). Ecoscape undertook post-revegetation monitoring in summer 2022 (3rd year of monitoring), which determined that 2 of 7 completion criteria had been met. Given 5 completion criteria had not been met after three years, management target 2 has not been achieved. As such, condition environmental objective 11-1(2) has not been met.</p> <p>DWER was notified of this failure to achieve the management target in November 2022 in accordance with Condition 7-4.</p> <p>The failure to achieve the management target is due to difficult site conditions, which includes poor seed germination within in-situ soils, extreme heat in summer of 2021/2022 and heavy predation by local fauna. The ongoing lack of success at this site is largely due to predation by kangaroos and to a lesser extent by rabbits.</p>	<p>Non-compliance</p>

Compliance Assessment Report

NorthLink WA Perth-Darwin National Highway (Swan Valley Section)

Condition environmental objective or outcome set in the Condition EMP or in MS 1036/MS 1116	Reporting on the management objectives and management annually, commencing 12 months from date of issue	Status
	<p>Main Roads have implemented a range of additional rehabilitation management actions with the aim of achieving the outstanding completion criteria, such that the management target can be met. This has included the installation of 435m of fauna exclusion fencing and an additional 5,776 infill plants in July 2022 as a trial to see if this protects planting from predation. (E-001), (R22-003)</p> <p>The steps taken are consistent with the proposed adaptive management protocols outlined in the CEMP, and as such the non-compliance solely relates to not achieving the completion criteria within the nominated 3 year timeframe.</p> <p>Despite the installation of the trial fencing in 2022, there is evidence of continued kangaroo access into the fenced area. Accordingly Main Roads is investigating fence improvements (including increasing the height) to be implemented in the first half of 2024 to further mitigate the risk of kangaroo predation. Furthermore, it is proposed that, pending availability of relevant seedlings, a prescribed quantity of select species will be planted within the improved area and in adjacent fenced areas to monitor the success of plant establishment in the fenced area compared with the non-fenced area (to better understand effectiveness). As such it is unlikely the revegetation will approach completion criteria for a number of years.</p> <p>The CEMP Flora and Vegetation – Progressive Rehabilitation (2018) details the completion criteria to meet the management targets of density and cover of rehabilitation. Amendments to the target completion percentages may be required to account for the site and contributing factors to low seedling survival. This may include broadening the range of species approved to plant and reducing the diversity whilst increasing the rehabilitation success using species able to survive in the soil type, climatic conditions and that are less prone to predation.</p>	
<p>Key environmental factor: Fauna MS 1036, Condition 12-1 Condition EMP: Fauna – Construction</p>		
<p>Condition environmental objective 12-1(1) (MS 1036): To ensure that impacts to conservation significant fauna are minimised as far as practicable during final design and construction of the proposal.</p>	<p>The Fauna – Construction – Condition EMP was implemented during design and construction of the project.</p> <p>The CEMP does not have post-construction management actions and is therefore no longer applicable.</p>	Completed
<p>Key environmental factor: Amenity (Noise) MS 1036, Condition 15-1 Condition EMP: Amenity (Noise)</p>		
<p>Condition environmental objective 15-1(1) (MS 1036): To ensure that impacts to the noise amenity of existing sensitive receptors delineated in Figure 7 of Schedule 1 [of the Ministerial Statement] and defined by geographic coordinates in Schedule 2 [of the Ministerial Statement], as a result of the ongoing operation of</p>	<p>The CEMP management target for this objective is '<i>affected landowners delineated in Figure 7 of Schedule 1 of the Ministerial Statement have been provided with property-specific noise mitigation packages as negotiated and agreed to by the landowner and MRWA.</i>'</p> <p>Main Roads liaised with all landowners identified in Figure 7 to provide suitable noise mitigation packages, as reported in previous years CARs.</p>	Compliant

Compliance Assessment Report

NorthLink WA Perth-Darwin National Highway (Swan Valley Section)

Condition environmental objective or outcome set in the Condition EMP or in MS 1036/MS 1116	Reporting on the management objectives and management annually, commencing 12 months from date of issue	Status
<p>the proposal are minimised as low as reasonably practicable.</p>	<p>Main Roads are required to maintain a noise complaints resolution process for a period of 5 years after implementation, as part of the post-construction monitoring framework. Main Roads has a corporate wide customer relationship management system CONNECT. It is used to record all customer enquiries, requests and complaints. Any complaints are recorded in CONNECT and forwarded to the responsible officer.</p> <p>For Northlink noise complaints, MRWA's Stakeholder and Communications Consultant has been engaging with the community to manage those complaints. No complaints for the Northlink project have been received during the reporting period.</p>	
<p>Condition environmental objective 15-1(2) (MS 1036): To ensure that the impacts to the noise amenity of existing sensitive receptors, are consistent with section 5.3 of State Planning Policy 5.4 for properties south of Maralla Road.</p>	<p>The CEMP management target for this objective is '<i>Outdoor noise for properties south of Maralla Road during operation is below 60 dB(A) Laeq (day) during the day (6.00 a.m. to 10.00 p.m.) and below 55 dB(A) Laeq (night) at night (10.00 p.m. to 6.00 a.m.) as prescribed in section 5.3 of State Planning Policy 5.4.</i>'</p> <p>Lloyd George Acoustics undertook monitoring from 24 to 28 October 2022 (R23-01).</p> <p>The results of the monitoring determined that noise levels were below the maximum levels specified in the CEMP management target in all monitoring locations and therefore are consistent with the condition environmental objective. (R23-01)</p>	Compliant

Compliance Assessment Report

NorthLink WA Perth-Darwin National Highway (Swan Valley Section)

4.2.2 Condition EMPs (outcome based)

The following plans are outcome based (rather than management based) EMPs:

- Inland Waters Environmental Quality – Hydrological Processes Condition Environmental Management Plan (Condition 13)
- Flora and Vegetation – Inland Waters – Condition Environmental Management Plan (Condition 14).

The outcome-based Condition EMPs have been assessed for compliance in achieving the environmental outcomes (through assessment of whether relevant environmental criteria are met), as well as being assessed for compliance with the MS conditions (**Table 3**).

For the 2023 CAR reporting period, the project is in the ‘post-construction/operational’ phase and therefore the relevant elements of the Condition EMPs requiring assessment is limited to the post-construction monitoring requirements. ‘Pre-construction’ or ‘construction’ elements (management actions and monitoring) have been previously completed and assessed as part of previous CARs and therefore are not applicable to the 2023 CAR reporting period. Emerge Associates are implementing the post-development monitoring program, as specified in each CEMP.

Table 3: Status of compliance with Condition EMPs (outcome based)

Condition Environmental Outcome	Reporting on Threshold Criteria	Status
Key environmental factor: Inland Waters Environmental Quality MS 1036, Condition 13-1, 13-8 to 13-10. Condition EMP: Inland Waters Environmental Quality – Hydrological Processes		
Condition environmental outcome 13-1(1) (MS 1036): The construction and operation of the proposal shall not result in an acceptable decline in water quality of the Gngangara Underground Water Pollution Control Area (GUWPCA).	In accordance with the CEMP, annual post-construction monitoring is required for a period of five years. Emerge Associates undertook monitoring in March and September 2023 (R23-16). Exceedances of some threshold criteria were recorded during the 2023 monitoring program; however, none were determined as being likely to be attributable to the operation activities of the project. The exceedances were assessed as non-project attributable based on surrounding land uses likely contributing, sampling locations being upgradient of the development envelope and analyte exceedances not showing concentrations trending upward. (R23-16).	Compliant
Condition environmental outcome 13-1(2) (MS 1036): The construction and operation of the proposal shall not result in an unacceptable decline in water quality of the Ellen Brook as confirmed by monitoring for a period of 5 years post construction.	All environmental criteria were determined to be met and as such all environmental outcomes were achieved for the reporting period.	
Condition 13-8: The proponent shall not construct any laydown areas, stockpiles, or store chemicals within the well head protection zones in the GUWPCA.	Construction activities have ceased and as provided within the 2020 CAR, the proponent has not constructed any laydown areas, stockpiles or stored chemicals within the wellhead protection zones of the GUWPCA (R21-005).	Compliant
Condition 13-9: Any fuel or chemicals stored within the GUWPCA shall: <ul style="list-style-type: none"> • Be contained within double-lined fuel storage tanks. • Not exceed an individual storage tank capacity of 5,000 L. 	All chemical storage locations were decommissioned prior to commencement of the reporting period. Shapefiles showing historical chemical storage locations are provided in D21-006.	Compliant

Compliance Assessment Report

NorthLink WA Perth-Darwin National Highway (Swan Valley Section)

Condition Environmental Outcome	Reporting on Threshold Criteria	Status
<ul style="list-style-type: none"> • Be placed in bunds capable of storing 125% of the capacity of the largest storage tank. • Not be located within well head protection zones. 		
<p>Condition 13-10: The proponent shall not construct infiltration basins, including bio-retention basins, within 100 m of drinking water production wells within the GUWPCA.</p>	As detailed within the 2020 CAR (R21-005), no infiltration basins, including bio-retention basins, have been constructed within 100 m of drinking water production wells within the GUWPCA (D21-006) (R21-006).	Compliant
<p>Key environmental factor: Flora and Vegetation MS 1116, Condition 14-1 Condition EMP: Flora and Vegetation – Inland Waters</p>		
<p>Condition environmental outcome 14-1(1) (MS 1116): Construction and operation of the proposal, including from dewatering and groundwater abstraction, does not result in indirect impacts to Communities of Tumulus Springs (Organic Mound Springs, Swan Coastal Plain) and Conservation Category Wetlands as shown in Figure 5 of Ministerial Statement 1036 and Figure 6 attached to this Statement.</p>	<p>In accordance with the CEMP, annual post-construction monitoring is required for a period of three years. Emerge Associates undertook monitoring in March and September 2023.</p> <p>The results of the September 2023 monitoring event returned exceedances of the trigger and/or threshold values for 44 of the 52 monitoring locations (groundwater and surface water) that were sampled. While there is large number of exceedances, the results were generally consistent with historic data, and any results varying from historical data have been investigated and reported. No exceedances were determined to be project attributable with the surrounding land use activities contributing to the majority of the exceedances.</p>	Compliant MRWA has requested that this condition be considered completed.
<p>Condition environmental outcome 14-1(2) (MS 1116): Construction of the proposal maintains predevelopment surface water flows to <i>Darwinia foetida</i>, Communities of Tumulus Springs (Organic Mound Springs, Swan Coastal Plain) and Conservation Category Wetlands as shown in Figures 3 and 5 of Ministerial Statement 1036 and Figure 6 attached to this Statement.</p>	<p>Five basin locations recorded exceedances of TRH which were subsequently re-tested using a silica gel analysis with the results showing all these locations falling below their respective trigger values.</p> <p>As such, all environmental criteria were determined to be met and all environmental outcomes were achieved for the reporting period. (R23-16).</p>	
<p>Condition 14-6 (MS 1116): The proponent shall not construct laydown areas or stockpiles within 50 m of Communities of Tumulus Springs (Organic Mound Springs, Swan Coastal Plain) and Conservation Category Wetlands as shown in Figures 5 of Ministerial Statement 1036 and Figure 6 attached to this Statement [MS 1116].</p>	<p>Shapefiles of laydown/stockpile areas indicated no construction in these areas (D21-006).</p> <p>All laydown areas were established within the permanent footprint of the works. No temporary laydown areas involving the clearing of native vegetation were constructed</p>	Compliant MRWA has requested that this condition be considered completed.

4.2.3 Other management plans

The following plans are not Condition EMPs and are therefore addressed separately:

- The Ippolo Road Site Land Acquisition and Management Plan.
- The *Caladenia huegelii* Habitat Management Plan.
- The Land Acquisition and Rehabilitation Offsets Strategy.
- SCP20a Offsets Strategy.

Compliance Assessment Report

NorthLink WA Perth-Darwin National Highway (Swan Valley Section)

Assessment of compliance against these plans is limited to assessing whether the overall environmental objective is being met through the implementation of the management activities (conforming, potentially non-conforming or non-conforming) provided in these plans (**Table 4**). Assessment of compliance of these plans against the MS conditions is provided in the audit table in **Appendix B**.

It is noted that Main Roads have developed these plans and set up a funding arrangement (Memorandum of Understanding [MoU]) with DBCA, in accordance with the MS 1036 conditions as outlined in **Appendix C** (L21-008). Additional funds were also provided to DBCA in relation to management under the MOU (L22-001).

In summary, Main Roads are conforming with implementation of the plans, but a number of management actions are still in process with some activities following through until 2026. There were no non-conformances or potential non-conformances with the above-mentioned plans and strategies during the reporting period.

Table 4: Status of compliance in undertaking the management activities and achieving the environmental objective

Management activities	Timeframe	Status and Justification
Ippolo Road Site Land Acquisition and Management Plan, MS 1116 Condition 16-2 to 16-7 Environmental Objective: To counterbalance the significant residual impact to: <ul style="list-style-type: none"> • 7.65 ha of A Class Nature Reserves; • 2020 ha of Carnaby's Cockatoo (<i>Calyptorhynchus latirostris</i>) foraging habitat; and • 99.1 ha of Forest Red-tailed Black Cockatoo (<i>Calyptorhynchus banksia naso</i>) foraging habitat. 		
Install nature reserve signage	2017	Completed Maintenance – as required for nature reserve signage (R23-12).
Install <i>Phytophthora cinnamomi</i> dieback signage	2017	Completed Maintenance – as required for dieback signage (R23-12).
Track closure and maintenance	2017-2023	Conforming Maintenance – no track closures were required, or no new tracks were created, however previous work/patrolling the nature reserve were undertaken (E23-20).
Gate maintenance	2017	Completed Gates have not been installed in the reserves as they are considered unlikely to prevent unauthorised access (as mentioned in the 2020 CAR) (R21-005). It was proposed to amend the Ippolo Road Management Plan to remove this requirement however, DWER advised on 21 November 2019 that the plan does not require an update (E21-017).
Remove rubbish	2017	Completed Monitoring and removal of rubbish dumping (e.g. refuge and any car bodies etc.) continues to be implemented (R23-12).
Feral animal monitoring and control (wild deer and feral pigs)	2017-2023	Conforming Monitor feral animals undertaken (feral deer and feral pigs) (R23-12).

Compliance Assessment Report

NorthLink WA Perth-Darwin National Highway (Swan Valley Section)

Management activities	Timeframe	Status and Justification
Survey and control of feral bees in black cockatoo habitat areas	2017, 2018, 2021, 2023	Conforming Feral beehive survey was undertaken in 2023. There has been a dramatic reduction of feral bees through the reserve since 2018 (R23-24).
<i>Phytophthora cinnamomi</i> dieback re-survey and treatment	2018 and 2021	Completed Second dieback survey and treatment undertaken in 2022, which identified minor insignificant extensions (0.06 ha) to the 2018 infested area boundaries. The uninfested areas are relatively undisturbed and in excellent condition. (R23-22).
<p>Land Acquisition and Rehabilitation Offsets Strategy, MS 1116 Conditions 16-8 to 16-11</p> <p>Environmental objective: To counterbalance the significant residual impacts to:</p> <ul style="list-style-type: none"> • 5.5 hectares of Yanga Complex. • 129.9 hectares of Bush Forever sites. • 5.2 hectares of <i>Calyptorhynchus latirostris</i> (Carnaby's black cockatoo) foraging habitat. • 21.4 hectares of <i>Calyptorhynchus banksii naso</i> (forest red-tailed black cockatoo) foraging habitat. • 16 hectares of Conservation Category Wetlands. 		
Lot 806 Brand Highway		
Develop a Rehabilitation Plan	December 2019	Completed
Implement the Rehabilitation Plan	Within 12 months of the completion of construction/ongoing	Completed Implementation (revegetation works) occurred in July 2020.
Completion of Rehabilitation (meets completion criteria)	Five years from commencement of rehabilitation	Not yet required (2025) Ongoing management actions continue to be implemented toward reaching completion criteria by nominated timeframe. This has included, amongst other items, installation of infill planting in Winter 2021, Winter 2022 and Winter 2023. Revegetation monitoring was completed in spring 2023, which identified that the completion criteria on track and recommended various management actions to assist in working toward achieving the remaining criteria in the target timeframe. (R23-09).

Compliance Assessment Report

NorthLink WA Perth-Darwin National Highway (Swan Valley Section)

Management activities	Timeframe	Status and Justification
Bush Forever Site 300		
Commencement of implementation of this plan	Prior to commencement of construction	Completed (R21-016)
Agreement of MoU	Within 6 months of approval of this plan	Completed MoU signed July 2019 (R21-016).
Provision of cable fencing and heavy-duty gates	By December 2019	Completed Cable fencing and heavy-duty gates installed October 2018 (R21-016).
Map weeds within Bush Forever 300	By December 2019	Completed Baseline weed mapping completed between October – December 2017 (R21-016).
Develop a weed control program for Bush Forever 300.	By December 2019	Completed Weed management plan prepared May 2018 (R21-016).
Implement weed control program.	Commenced by June 2020	Completed Weed control undertaken for 4 years (2018-2021), with latest control completed in January 2021 (D22-001). MRWA engaged NAMS to undertake weed mapping survey in December 2021 which determined that the 80% weed reduction completion criteria had been achieved (R22-004).
<i>Phytophthora cinnamomi</i> mapping	By December 2019 and December 2021	Completed Initial mapping completed December 2017, with follow up mapping completed 2019. Final dieback mapping completed by DBCA in April and May 2022 (R22-002).
Develop hygiene plan and install washdown points at heavy duty gates	By December 2019	Completed DBCA developed Hygiene Plan for all of Bush Forever 300 in May 2018. Washdown points installed by DBCA in December 2018 (R21-016).
Flora and vegetation survey	By December 2019	Completed Report completed February 2019 (R21-016).
Nirimba / Carrabungup		
Removal of internal fences	By December 2019	Completed (R21-016)
Upgrading of boundary fence (not cable fencing)	By December 2019	Completed (R21-016)

Compliance Assessment Report

NorthLink WA Perth-Darwin National Highway (Swan Valley Section)

Management activities	Timeframe	Status and Justification
Installation of new firebreaks	By December 2019	Completed (R21-016)
Maintenance of existing firebreaks	2017 – 2023	Conforming Maintenance of firebreaks is ongoing, most recent maintenance undertaken in November 2023 (E23_19)
Weed control (Watsonia, Arum Lily and Tagasaste)	2021 – 2023	Conforming Ongoing, with weed control across 2021 revegetation site completed between in spring 2022. Revegetation site expanded this year again to assist in weed control works. (E23-19).
<i>Phytophthora cinnamomi</i> mapping	Completed July 2017	Completed July 2017 (R21-016)
Feral pig control	2017 – 2023	Conforming Ongoing pig control works undertaken throughout the reporting period, including the following management measures: <ul style="list-style-type: none"> • Monitoring for pigs using remote cameras • On-ground surveys for signs of pig activity undertaken. • Pre-feeding station and monitoring prior to trapping • Control through shooting. (E23_19)
Lot 252 Birchmont		
Provision of new fences (1.8 km of cable fencing and 4 heavy duty gates installed)	December 2019	Complete (R21-016) Installation of 1.2 km cable fence completed along northern boundary December 2022 ()
Upgrade existing firebreaks	By December 2020	Complete (R21-016)
Firebreak maintenance	Annually until 2025	Conforming Ongoing, with most recent firebreak maintenance undertaken November 2022 (R23-25).
Feral pig control	Annually 2019 – 2025	Conforming Ongoing, no pig activity was detected this reporting period due to previous integrated program (R23-25).
Install signage	By December 2020	Complete (R21-016)
Weed mapping	2019, 2021 and 2025	Conforming Weed mapping completed in 2019 (R21-026) and 2021. Final weed mapping to be completed 2025.
Weed control	Annually from 2020 to 2025	Conforming Ongoing, with most recent weed control program implemented June – September 2022 (R23-25).

Compliance Assessment Report

NorthLink WA Perth-Darwin National Highway (Swan Valley Section)

Management activities	Timeframe	Status and Justification
<i>Phytophthora cinnamomi</i> mapping and management plan	Baseline mapping and management plan by December 2019 Follow up mapping in 2022	Conforming Baseline mapping completed Linear dieback re-survey was completed in 2023 (R23-25).
ASS investigation and feasibility study	By December 2019	Complete (R21-016).
ASS management	Up until 2025	Conforming Cultural heritage survey for works to mitigate saltwater intrusion into wetland was undertaken in September 2023 (R23-25).
Rubbish removal	By December 2019	Complete (R21-016)
Lake Clifton		
Removal of internal fences	December 2018	Complete (R21-016)
Provision of new fences	December 2019	Complete (R21-016)
Weed monitoring and control	Annually from 2017 to 2023	Conforming Ongoing, with most recent control of declared weeds (predominantly Arum Lily) undertaken August – December 2021 and most recent control of cotton bush completed April – May 2022 (R22-001).
Firebreak installation	By December 2018	Complete (R21-016)
Firebreak maintenance	Annually from 2017 to 2023	Conforming Ongoing, with most recent maintenance of firebreaks undertaken in November 2021 (R22-001).
Feral pig monitoring	Annually from 2017 to 2023	Conforming Ongoing, with pig eradication undertaken throughout the year through a contract shooter as pig numbers were seen to have increased (R22-001).
Cat baiting program	Annually from 2018 – 2024	Conforming Camera monitoring still underway and approvals now gained for implementation of baiting to compliment 1080 fox control program (E23-19).

Compliance Assessment Report

NorthLink WA Perth-Darwin National Highway (Swan Valley Section)

Management activities	Timeframe	Status and Justification
<i>Caladenia huegelii</i> Habitat Management Plan, MS 1036 and MS 1116, Conditions 16-12 to 16-18		
Environmental objective: To maintain or improve the conservation status of <i>Caladenia huegelii</i>		
Nature Reserves 46875 and 46919 and Bush Forever Site 300		
Provision of cable fencing and heavy-duty gates	By December 2018	Complete (D22-001)
Weed mapping and develop weed control program	By December 2017	Complete Baseline weed mapping and weed control program completed in 2017 (D22-001)
Weed control program implementation	2018 to 2020	Complete Weed control undertaken for 4 years (2018-2021), with latest control completed in January 2021 (D22_001).
<i>Phytophthora cinnamomi</i> mapping	Baseline mapping December 2017. Follow up mapping in 2019 and 2021.	Complete Initial mapping completed December 2017, with follow up mapping completed 2019. Final dieback mapping completed by DBCA in April and May 2022 (D22-001) (R22-002).
Development of a hygiene plan	By December 2017	Complete (D22-001)
<i>Caladenia huegelii</i> surveys and critical habitat mapping	Baseline surveys and mapping October 2017 and then annually in October until 2020.	Complete (D22-001) Surveys completed 2018-2020. DBCA provided final survey report in March 2021. (D22-001)
Install washdown points at heavy duty gates in accordance with the hygiene plan.	By December 2018	Complete (D22-001)
Kooljerrenup (Nature Reserve 23756)		
Provision of cable fencing and heavy-duty gates	By December 2019	Complete (R21-016)
Weed mapping and develop weed control program	By December 2018	Complete Weed mapping and management plan report finalised December 2018 (D22-001).
Weed control program implementation	2019 to 2021	Complete Weed control implemented 2019, with post-control photo monitoring subsequently completed. DBCA conducted revegetation in previously weed-infested areas to control weeds June – August 2021. DBCA prepared a final weed mapping report in 2021. (D22-001)
<i>Phytophthora cinnamomi</i> mapping	Baseline mapping December 2018. Follow up mapping in 2020 and 2022.	Complete Baseline dieback mapping completed in July 2018, with follow up mapping completed in July 2021 (D22-001) and June 2022 (R22-017).

Compliance Assessment Report

NorthLink WA Perth-Darwin National Highway (Swan Valley Section)

Management activities	Timeframe	Status and Justification
Development of a hygiene plan	By December 2017	Complete (D22-001)
<i>Caladenia huegelii</i> surveys and critical habitat mapping	Baseline surveys and mapping October 2017 and then annually in October until 2020.	Complete Surveys completed 2017-2020. DBCA provided final survey report in March 2021. (D22-001)
Feral pig control - camera installation	By December 2017	Complete (D22-001)
Feral pig control - develop pig control plan	By July 2018	Complete (D22-001)
Feral pig control – implement pig control plan and undertake ongoing surveillance with camera traps.	July 2018 to June 2021	Complete Surveillance completed from July 2018 to June 2021. Feral pig control completed December 2021 (D22-001).
SCP20a Offsets Strategy MS 1116 Conditions 16-19 to 16-22 Environmental objective: Counterbalance the significant residual impact to 4 ha of TEC SCP 20a, ' <i>Banksia attenuata</i> woodlands over species rich dense shrublands' as a result of the implementation of the proposal.		
Errina Road Bushland		
Flora and vegetation survey	By December 2018	Complete (R21-016)
Weed mapping	Baseline – December 2020 Monitoring – by December 2023 and December 2026	Complete (baseline) (R21-016) Not yet required (monitoring). To be completed in December 2023.
Weed control	Annually from 2020 to 2026	Conforming Ongoing, with most recent weed control implemented June-October 2023 (R23-25).
<i>Phytophthora</i> mapping	By December 2021	Completed (E21-003)
<i>Phytophthora</i> management plan	By December 2021	The reserve was assessed as being completely dieback free. On this basis DBCA determined a <i>Phytophthora</i> management plan is not operationally required for reserve management, as DBCA standard operating procedure is to be clean on entry. (E22-019).
Interpretive signage	By December 2020	Complete Installed in June 2020 (R21-016)
Limestone paths	By December 2020	Complete (R21-016)
Replacement of fencing	By December 2021	Complete (R21-012)
Revegetation planting within degraded areas	By December 2022	Revegetation via tree planting and seeding of closed tracks has occurred to date. Revegetation works of remaining degraded areas are still to be carried out by DBCA. Completion criterion not yet achieved. (E23_18).

Compliance Assessment Report

NorthLink WA Perth-Darwin National Highway (Swan Valley Section)

Management activities	Timeframe	Status and Justification
Rubbish removal	Annually from 2020 to 2026	Compliant Rubbish removed from offset site throughout winter 2023 (E23-25).
Orange Grove / White Road		
Flora and vegetation survey	By December 2018 By December 2021	Completed 2018 Flora and vegetation survey complete. 2021 Flora and vegetation survey was undertaken Spring 2022, report finalized in July 2023 (R23-19)
Weed mapping	By December 2021	Completed Updated weed mapping was undertaken in Spring 2022 with report finalised in November 2022 (R23-20)
Weed control	Annually from 2020 to 2026	Conforming DBCA completed ongoing weed control throughout 2023 for a range of woody weeds (including Victorian tea tree, eastern state wattles, tags) and other weeds (including veldt grass, love grass, watsonia, Geraldton wax). (E22-20)
<i>Phytophthora</i> mapping and treatment	By December 2020, December 2022, December 2024 and December 2026	Conforming Ongoing, with latest survey and treatment completed December 2022. No new infestations were identified during this 2022 assessment. (R23-21).
Interpretive signage	By December 2020 (8 nature reserve signs) By December 2021 (8 dieback signs) By December 2025 (reserve information board)	Complete Complete (E21-009) Not yet required
Shelter installation	By December 2025	Not yet required
Installation of fencing	By December 2021	Delayed due to woody weeds which is currently being addressed. Scheduled for 2024 (R23-11)
Demolition of existing house	Before December 2023	Complete Removal of house within Lot 29 and clean-up of immediate surroundings occurred in late 2019.
Revegetation planting within degraded areas	By December 2022 and ongoing until December 2026	Revegetation preparation works have commenced and are ongoing, primarily associated with weed control. DBCA have advised weed control is ongoing. Revegetation of the house site is delayed due to Aboriginal Heritage Act uncertainty and some very large eastern states eucalypts to be removed. Completion criterion not yet achieved. (R23-11).
Rubbish removal	Annually from 2020 to 2026	Conforming Ongoing, with removal of rubbish undertaken (R23-11).

Compliance Assessment Report

NorthLink WA Perth-Darwin National Highway (Swan Valley Section)

Management activities	Timeframe	Status and Justification
Reserve environmental management plan	By December 2022	Conforming Currently under preparation and on track for completion in in 2024 (R23-11).
Feral bee control	Annually from 2020 to 2026	Conforming Ongoing, with most recent control and treatment completed in October 2023 (R23-18).
Hawkesvale Nature Reserve		
Flora and vegetation survey	By December 2018	Completed (R21-016)
Weed mapping	Baseline by December 2020 Monitoring by December 2023 and December 2026	Completed (baseline) in June 2020 (R21-016) The weed control program was implemented for the offset site in May-September 2023, including an area that was burnt in 2020.
Weed control	Annually from 2020 to 2026	Conforming Ongoing, with most recent weed control implemented May-Sept 2022, including an area burnt in 2020 (R23-25).
Phytophthora mapping	By December 2021	Completed (E21-018) DPaW completed the <i>Phytophthora cinnamomi</i> occurrence map in December 2020 (D21-002) and compiled a dieback report (L21-002), which identified the area as wholly uninfested.
<i>Phytophthora</i> management plan	By December 2021	The reserve was assessed as being completely dieback free. On this basis DBCA determined a <i>Phytophthora</i> management plan is not operationally required for reserve management, as DBCA standard operating procedure is to be clean on entry.
Interpretive signage	By December 2020	Complete Installed in June 2020 (R21-016).
Revegetation planting within degraded areas	By December 2021	Conforming Approximately half of the reserve was impacted by a bushfire in early 2021. At least 0.25 ha of the fire scar area will be revegetated, consistent with the requirements of the Offset Strategy. To date, DBCA have revegetated the machine tracks (created to fight the bushfire) via direct seeding. In 2023 a Friends of Hawkvale Nature Reserve group carried out winter tree planting. (R23-25).

Compliance Assessment Report

5 Supporting/Verifying Information

A range of supporting/verifying information was utilised to prepare this CAR, including:

- Correspondence provided by Main Roads.
- Monitoring reports, letters or memorandums provided by Main Roads.
- Environmental assessment reports provided by Emerge Associates.
- Personal communication with the Main Roads Principal Environmental Officer, John Braid and Tony Carlino.

Key pieces of verifiable information for the assessment of implementation of MS 1036 and MS 1116 conditions are referenced in **Appendix C** and provided separately in electronic format. It should be noted that further supporting evidence, should it be required, can be provided upon request.

Compliance Assessment Report

NorthLink WA Perth-Darwin National Highway (Swan Valley Section)

6 Other Information

The proponent does not have any other information to provide in this CAR.

Appendix A

Compliance Status of Key Characteristics

Compliance Assessment Report

NorthLink WA Perth-Darwin National Highway (Swan Valley Section)

Table A1: Compliance Status of Key Characteristics of Proposal

Element	Description of Proposal	Status	Further Information
Clearing and disturbance for road corridor, drainage structures including infiltration and bioretention basins and swales, laydowns, bridges and culverts, fauna fencing, fauna underpasses, noise walls, road train assembly area and principal shared path.	<p>Clearing and disturbance of no more 765.07 ha consisting of up to 206 ha of native vegetation. This includes up to:</p> <ul style="list-style-type: none"> • 129.9 ha of Bush Forever areas • 0.4 ha of Class A Nature Reserve 46920 • 0.2 ha of Class A Nature Reserve 46919 • 32.6 ha of Gngangara-Moore River State Forest No. 65 • 4 ha of Floristic Community Type SCP 20a Threatened Ecological Community • 31.9 ha of <i>Caladenia huegelii</i> critical habitat • 2 ha of <i>Grevillea curviloba</i> subsp. <i>incurva</i> critical habitat • 16 ha of Conservation Category Wetlands <p>Within a 1,004.07 ha development envelope.</p>	CLD	<p>Construction phase of the project is complete.</p> <p>Total clearing and disturbance, as reported by the Northlink Infrastructure Report (R21-006) is:</p> <ul style="list-style-type: none"> • 92.5 ha of Bush Forever areas • 0.07 ha of Class A Nature Reserve 46920 • 0.2 ha of Class A Nature Reserve 46919 • 27.6 ha of Gngangara-Moore River State Forest No. 65 • 3.9 ha of Floristic Community Type SCP 20a Threatened Ecological Community • 29.8 ha of <i>Caladenia huegelii</i> critical habitat • 1.6 ha of <i>Grevillea curviloba</i> subsp. <i>incurva</i> critical habitat • 13.3 ha of Conservation Category Wetlands <p>Within a 1,004.07 ha development envelope.</p>
Noise walls	<p>Height of noise walls to be no more than 5 m on residential boundaries between Reid Highway and south of Maralla Road.</p>	CLD	<p>Construction phase of the project is complete.</p> <p>Two noise walls have been installed within the development envelope to a height of 5.5 m (NW-16 (CHA 544-676) and NW-19 (CHA 262-406)) (R21-006). However, the listed noise walls are offset from the property boundaries and are adjacent to the road alignment. The properties are elevated above the road, so the top of the noise walls will be less than 5 m, as reported in the 2019 CAR.</p>

Condition	Requirement	How	Evidence	Phase	Timeframe	Status	Further Information
Proposal Implementation							
MS 1036: M1-1	When implementing the proposal, the proponent shall not exceed the authorised extent of the proposal as defined in Table 2 in Schedule 1, unless amendments to the proposal and the authorised extent of the proposal have been approved under the EP Act.	Implement project pursuant to Table 2 in Schedule 1 of MS 1036.	CAR.	Overall	Annually	CLD	s45C change to proposal, and clearing limits, approved 7 June 2017. Compliance details provided in Table A1 (within Appendix A).
Contact Details							
MS 1036: M2-1	The proponent shall notify the CEO of any change of its name, physical address or postal address for the serving of notices or other correspondence within twenty-eight (28) days of such change. Where the proponent is a corporation or an association of persons, whether incorporated or not, the postal address is that of the principal place of business or of the principal office in the State.	Notify the CEO in writing of any change to proponent details.	Copy of written notification to CEO of any change in proponent details.	Overall	Within twenty-eight (28) days of such change.	NR	Review of requested information from the proponent indicated no changes have occurred during the reporting period.
Time Limit for Proposal Implementation							
MS 1036: M3-1	The proponent shall not commence implementation of the proposal after five (5) years from the date on this Statement, and any commencement, prior to this date, must be substantial.	Provide evidence to the CEO in writing to demonstrate the proposal has substantially commenced.	CAR.	Construction	Implement proposal within five (5) years from date on MS 1036.	CLD	Ground disturbance associated with the proposal commenced on 31 March 2017, prior to 20 September 2021. Reported in the 2017 CAR (Coffey 2017) (R21-004).

Compliance Assessment Report

NorthLink WA Perth-Darwin National Highway (Swan Valley Section)

Condition	Requirement	How	Evidence	Phase	Timeframe	Status	Further Information
MS 1036: M3-2	Any commencement of implementation of the proposal, on or before five (5) years from the date of this Statement, must be demonstrated as substantial by providing the CEO with written evidence, on or before the expiration of five (5) years from the date of this Statement.	Provide evidence to the CEO in writing to demonstrate the proposal has substantially commenced.	Copy of written notification to CEO of substantial commencement	Construction	Implement proposal within five (5) years from date on MS 1036.	CLD	Ground disturbance commenced on 31 March 2017, as reported in the 2017 CAR (Coffey 2017) (R21-004).
Compliance Reporting							
MS 1036: M4-1	The proponent shall prepare, submit and maintain a Compliance Assessment Plan to the CEO at least six (6) months prior to the first Compliance Assessment Report required by condition 4-6, or prior to implementation, whichever is sooner.	Submit a Compliance Assessment Plan (CAP).	CAP.	Pre-construction	At least six (6) months prior to the first CAR required by condition 4-6, or prior to implementation, whichever is sooner.	CLD	The CAP was submitted in October 2016. The first CAR was submitted in December 2017 (Coffey 2017) (R21-004).
MS 1036: M4-2	The Compliance Assessment Plan shall indicate: <ul style="list-style-type: none"> • The frequency of compliance reporting. • The approach and timing of compliance assessments. • The retention of compliance assessments. • The method of reporting of potential non-compliances and corrective actions taken. • The table of contents of Compliance Assessment Reports. • Public availability of Compliance Assessment Reports. 	Submit CAP.	CAP.	Pre-construction	At least six (6) months prior to the first CAR required by condition 4-6, or prior to implementation, whichever is sooner.	CLD	CAP (Revision [Rev] 1) was approved by OEPA, as reported in the 2017 CAR (Coffey 2017) (R21-004). The CAP (Rev 2) was revised and approved by DWER on 7 February 2019 (L21-003).

Compliance Assessment Report

NorthLink WA Perth-Darwin National Highway (Swan Valley Section)

Condition	Requirement	How	Evidence	Phase	Timeframe	Status	Further Information
MS 1036: M4-3	After receiving notice in writing from the CEO that the Compliance Assessment Plan satisfies the requirements of condition 4-2 the proponent shall assess compliance with conditions in accordance with the Compliance Assessment Plan required by condition 4-1.	Once approval is received from the CEO, commence compliance assessment in accordance with the CAP.	CEO letter approving the CAP. CAR.	Overall	After written approval from the CEO.	C	This CAR (2023) is the seventh CAR to be produced. All seven CARs have been developed in accordance with the CAP.
MS 1036: M4-4	The proponent shall retain reports of all compliance assessments described in the Compliance Assessment Plan required by condition 4-1 and shall make those reports available when requested by the CEO.	Retain CAR's and make available when requested.	CAR.	Overall	As requested by the CEO.	C	This CAR (2023) is the seventh CAR to be produced. The six previous reports are kept as records on the MRWA website: https://www.mainroads.wa.gov.au/community-environment/environment/construction-project-reports/
MS 1036: M4-5	The proponent shall advise the CEO of any potential non-compliance within seven (7) days of that non-compliance being known.	Notify the CEO of potential non-compliances in writing and/or verbally.	Written notification. CAR.	Overall	Within seven (7) days of that non-compliance being known.	C	A non-compliance was noted within the reporting period. CEO was advised on 18 November 2022 (E23-04).

Compliance Assessment Report

NorthLink WA Perth-Darwin National Highway (Swan Valley Section)

Condition	Requirement	How	Evidence	Phase	Timeframe	Status	Further Information
MS 1036: M4-6	<p>The proponent shall submit to the CEO the first Compliance Assessment Report fifteen (15) months from the date of issue of this Statement addressing the twelve (12) month period from the date of issue of this Statement and then annually from the date of submission of the first Compliance Assessment Report, or as otherwise agreed in writing by the CEO.</p> <p>The Compliance Assessment Report shall:</p> <ul style="list-style-type: none"> • Be endorsed by the proponent's Chief Executive Officer or a person delegated to sign on the Chief Executive Officer's behalf. • Include a statement as to whether the proponent has complied with the conditions. • Identify all potential non-compliances and describe corrective and preventative actions taken. • Be made publicly available in accordance with the approved Compliance Assessment Plan. • Indicate any proposed changes to the Compliance Assessment Plan required by condition 4-1. 	Submit a CAR within required timeframe reporting on the previous 12 months.	CAR.	Overall	<p>Initial CAR within 15 months from date of MS 1036.</p> <p>Annually from date of submission of first CAR or a date as agreed by CEO.</p>	C	<p>This CAR is the seventh CAR and addresses the requirements of the condition, where required. This CAR will be made publicly available on the Main Roads website, as has occurred for other documents, including the previous six CARs.</p>
