

# Heavy Lift Tow Truck

## 23.5t Tri Drive Over-mass - Period Permit

### Restricted Bridges

Version: October 2016

## Purpose

The table in this document provide details of all the Restricted Bridges for over mass single steer axle with a rear Tri axle group Tow Truck.

***An over mass rear Tri Axle group Tow Truck must not be driven on any Restricted Bridge listed in this document.***

## How to use this publication

1. *Structures (Bridges) Location Map Books* are available on the Main Roads website at [www.mainroads.wa.gov.au/UsingRoads/HeavyVehicles](http://www.mainroads.wa.gov.au/UsingRoads/HeavyVehicles) . Operators/drivers need to look at the relevant map and establish if there are any bridges along the intended route, and take note of the bridge numbers.
2. Check the list of Restricted Bridges to ensure that none of the bridge numbers on the intended route are listed in this table. If a bridge is listed as a Restricted Bridge in the table, the bridge must not be driven over.
3. The Latitude and Longitude position of each bridge have also been included should you wish to log them in your GPS device as a Point of Interest (POI).
4. **The list is subject to amendments as bridges are re-assessed, which includes bridges being added as a restricted bridge, as well as bridges removed from the Restricted Bridge list. Operators and drivers are responsible for ensuring that they check the current listing of *Restricted Bridges*, available on the Main Roads website at [www.mainroads.wa.gov.au/UsingRoads/HeavyVehicles](http://www.mainroads.wa.gov.au/UsingRoads/HeavyVehicles) prior to operating the vehicle on the public road network.**
5. If amendments are made to the list, they will be made on the first working Monday of the month and will be published on the Main Roads website at this time

**1. The Tow Truck must not be driven on any bridge listed in the following table:**
