

# OVERTAKING IN THE ROAD TRAIN DOMAIN

It's important when travelling in the Road Train Domain to be patient when travelling behind a slower moving road train and wait for the next overtaking lane if you need to pass.

If an overtaking lane isn't available, remember these 3 steps for a safe overtake:

1

## CHECK AHEAD

Check ahead for a long, straight stretch of road. Remember road trains can be up to 60 metres long and you will need plenty of distance to overtake. Never overtake on a curve or hill where visibility is reduced.

2

## MOVE OUT WHEN SAFE

Indicate and move out when safe and maintain a safe and steady speed as you pass.

3

## LEAVE SPACE

Leave plenty of space when you move back into your lane. Wait until you can see the truck's headlights in your rear-view mirror. Leaving space will ensure you are not caught in the driver's blind spot. Don't forget to indicate when returning to your lane.

## #RoadTrainDomain

Understanding the 'Road Train Domain' will assist in getting everyone to their destination safely.
