

## Canning Bridge: Maintenance Works

Main Roads will be undertaking maintenance works on the Canning Bridge from mid-2026 to mid-2027.

A contract has been awarded to Jomar WA to complete routine repairs and strengthening works that will ensure the bridge's continued operation well into the future.

Most of this maintenance work will be undertaken below the bridge, from vessels located within the river channels. To respect the bridge's heritage status, new steel piles will be installed then clad with timber from the existing piles.

On the bridge deck, work will focus on repairing or replacing guardrails and balustrades, path repairs and asphalt resurfacing.

This \$5 million maintenance project is funded by the State Government.

### What to expect during construction

For safety reasons, there may be minor detours or stop/slow traffic management on the Principal Shared Path (PSP) adjacent to the river foreshore.

Works on the bridge deck are likely to be undertaken after hours

to avoid traffic congestion. Road users should expect lane closures and speed reductions during these activities.
