9 SPEED & SAFE TRAVEL CONDITIONS

9.1 Speed Restrictions

9.1.1 A RAV exceeding 3.5 metres in width travelling during the day must not be driven at a speed that exceeds the lesser of:

- 80 km/h; or
- 10 km/h below the posted speed limit.

- 9.1.2** A RAV exceeding 2.5 metres in width travelling at night must not be driven at a speed that exceeds the lesser of:
- (a) 80 km/h; or
 - (b) 10 km/h below the posted speed limit.
- 9.1.3** A RAV approaching a railway crossing must be driven at a speed at which the driver can, if necessary, stop safely before the crossing.
- 9.1.4** A RAV approaching any fixed obstacle, including roadside furniture, traffic signals, guardrails etc. must be driven at a speed at which the driver can safely negotiate the obstacle and if necessary, stop safely.
- 9.1.5** A RAV approaching another vehicle in the opposing direction must be driven at a speed at which the driver can, if necessary, move over or stop safely before passing.

9.2 Passing & Overtaking

- 9.2.1** The driver of a RAV or lead pilot must monitor the UHF channel 40 for oncoming RAVs. Where it is identified that two RAVs will need to pass in opposing directions and the road width is not adequate, a RAV passing a suitable parking bay must stop in the parking bay until the approaching RAV passes. All involved parties must communicate with one another to determine who will stop in a parking bay, or if no parking bay is available, move off the road at a suitable location.
- 9.2.2** Where the road width is not sufficient to allow an oncoming vehicle to pass the RAV and for both vehicles to remain on the sealed section of road, the RAV driver must determine which vehicle is a higher risk. Higher risk includes factors, such as heavier axle loadings and higher centre of gravity. The higher risk vehicle must remain on the sealed section of road, where practicable.

9.3 Minimum Following Distance

The driver of a RAV must maintain a distance of at least 200 metres from any other heavy vehicle travelling in front of it, unless:

- (a) The RAVs are travelling in convoy in accordance with these operating conditions; or
- (b) The RAV is overtaking the vehicle in front or the vehicle in front is stopping; or
- (c) There is a separate lane available for the use of overtaking traffic; or
- (d) The RAV is in an urban area and it is not reasonably practicable to maintain such a distance; or
- (e) The RAV is stopped, or coming to a stop for the purpose of complying with a provision of any law or avoiding conflict with other traffic.

9.4 Poor Visibility

- 9.4.1** The driver of a RAV must not begin to travel if, due to circumstances such as fog, heavy rain, smoke, dust or insect plague:
- (a) The visibility is less than 250 metres during the day; or
 - (b) The headlights of a vehicle approaching within 250 metres could not be seen at night.
- 9.4.2** Where a RAV is already travelling when visibility is reduced to the level described above, the driver must drive into the nearest safe parking area and wait until visibility improves beyond that level before continuing to travel.

10 WARNING DEVICES

10.1 Lights

10.1.1 A RAV must operate with headlights switched on at all times.

10.1.2 A RAV in excess of 3.0 metres in width or 25 metres in length must display at least one amber flashing warning light, which must be visible in all directions, or must be supplemented by additional warning lights so at least one warning light is visible in all directions.

10.1.3 A warning light must comply with the requirements set out in the *Oversize Vehicle & Pilot Vehicle General Requirements*.

10.1.4 A RAV must not display an amber flashing warning light if not required under this clause.

10.2 Warning Signs & Flags

10.2.1 A RAV exceeding 2.5 metres in width and/or 25 metres in length must clearly display:

- (a) An "Oversize" warning sign on the front of the vehicle; and
- (b) An "Oversize" warning sign on the rear of the vehicle; and
- (c) Four (4) warning flags. One flag must be positioned at each side of both the front and rear of the vehicle, or if there is any projecting load, at each side of both the front and rear of the projecting load.

10.2.2 An "Oversize" warning sign and warning flag must comply with the requirements set out in the *Oversize Vehicle & Pilot Vehicle General Requirements*.

10.2.3 An OSV must not display an "Oversize" warning sign if not required under this clause.

10.3 Additional Warning Devices at Night

10.3.1 If travelling at night, a RAV in excess of 2.5 metres in width and/or 25 metres in length must display at least one amber flashing warning light, which must be visible in all directions, or must be supplemented by additional warning lights so at least one warning light is visible in all directions.

10.3.2 A warning light must comply with the requirements outlined in the *Oversize Vehicle & Pilot Vehicle General Requirements*.

10.3.3 A RAV travelling at night must also display:

- (a) Lights showing yellow to the front and red to the rear (known as "side markers"), no more than 2 metres apart along both sides of the vehicle; and
- (b) If in excess of 2.5 metres in width, yellow or white lights (known as "front clearance lights") on the front of the trailer deck, one on each side of the trailer, as near as practical to the front outer edge and clearly visible to oncoming traffic.

11 PILOT REQUIREMENTS

11.1.6 The headlights or day running lights on a pilot vehicle must be switched on when accompanying a RAV.

11.1.7 A pilot vehicle must not tow a trailer or carry a load, but it may carry tools, equipment or substances for use in connection with the RAV it is accompanying.

11.1.8 The pilot must not operate any other vehicle or machinery, such as steer a platform, whilst accompanying a RAV.

11.2.1 When accompanying a RAV, pilot vehicles must have amber flashing warning lights operating in accordance with the *Oversize Vehicle & Pilot Vehicle General Requirements*.

11.2.2 When accompanying a RAV, pilot vehicles must have "Oversize Load Ahead" warning signs displayed in accordance with the *Oversize Vehicle & Pilot Vehicle General Requirements*.

11.2.3 Pilot vehicles must not have warning lights operating or signs displayed when not accompanying a RAV.

11.3 Managing Traffic

11.3.1 The lead pilot must use UHF Channel 40 at regular intervals to warn oncoming traffic of the approaching RAV.

11.3.2 In accordance with clause 9.2, the lead pilot must monitor the UHF channel 40 for oncoming RAVs or oncoming higher risk vehicles and must facilitate the RAV or the other vehicles pulling into parking bays, or other appropriate areas, to enable the oncoming vehicles to pass safely.

11.3.3 To ensure the oncoming traffic can pass the RAV safely, the lead pilot must give clear lawful directions to oncoming traffic to move off the road. If a vehicle is not a sufficient distance off the road to allow clear passage of the RAV, the pilot must advise the driver of the RAV and the RAV must stop until the passage is clear.

11.4 Position of Pilot Vehicles

11.4.1 When one (1) pilot vehicle accompanies a RAV, the pilot vehicle must travel:

- (a) Behind the RAV when travelling on a road with multiple lanes in the direction of travel (other than overtaking lanes); or
