

Planning for the future of Anketell Road

We're planning for the upgrade of Anketell Road to create a future road freight corridor to Kwinana.

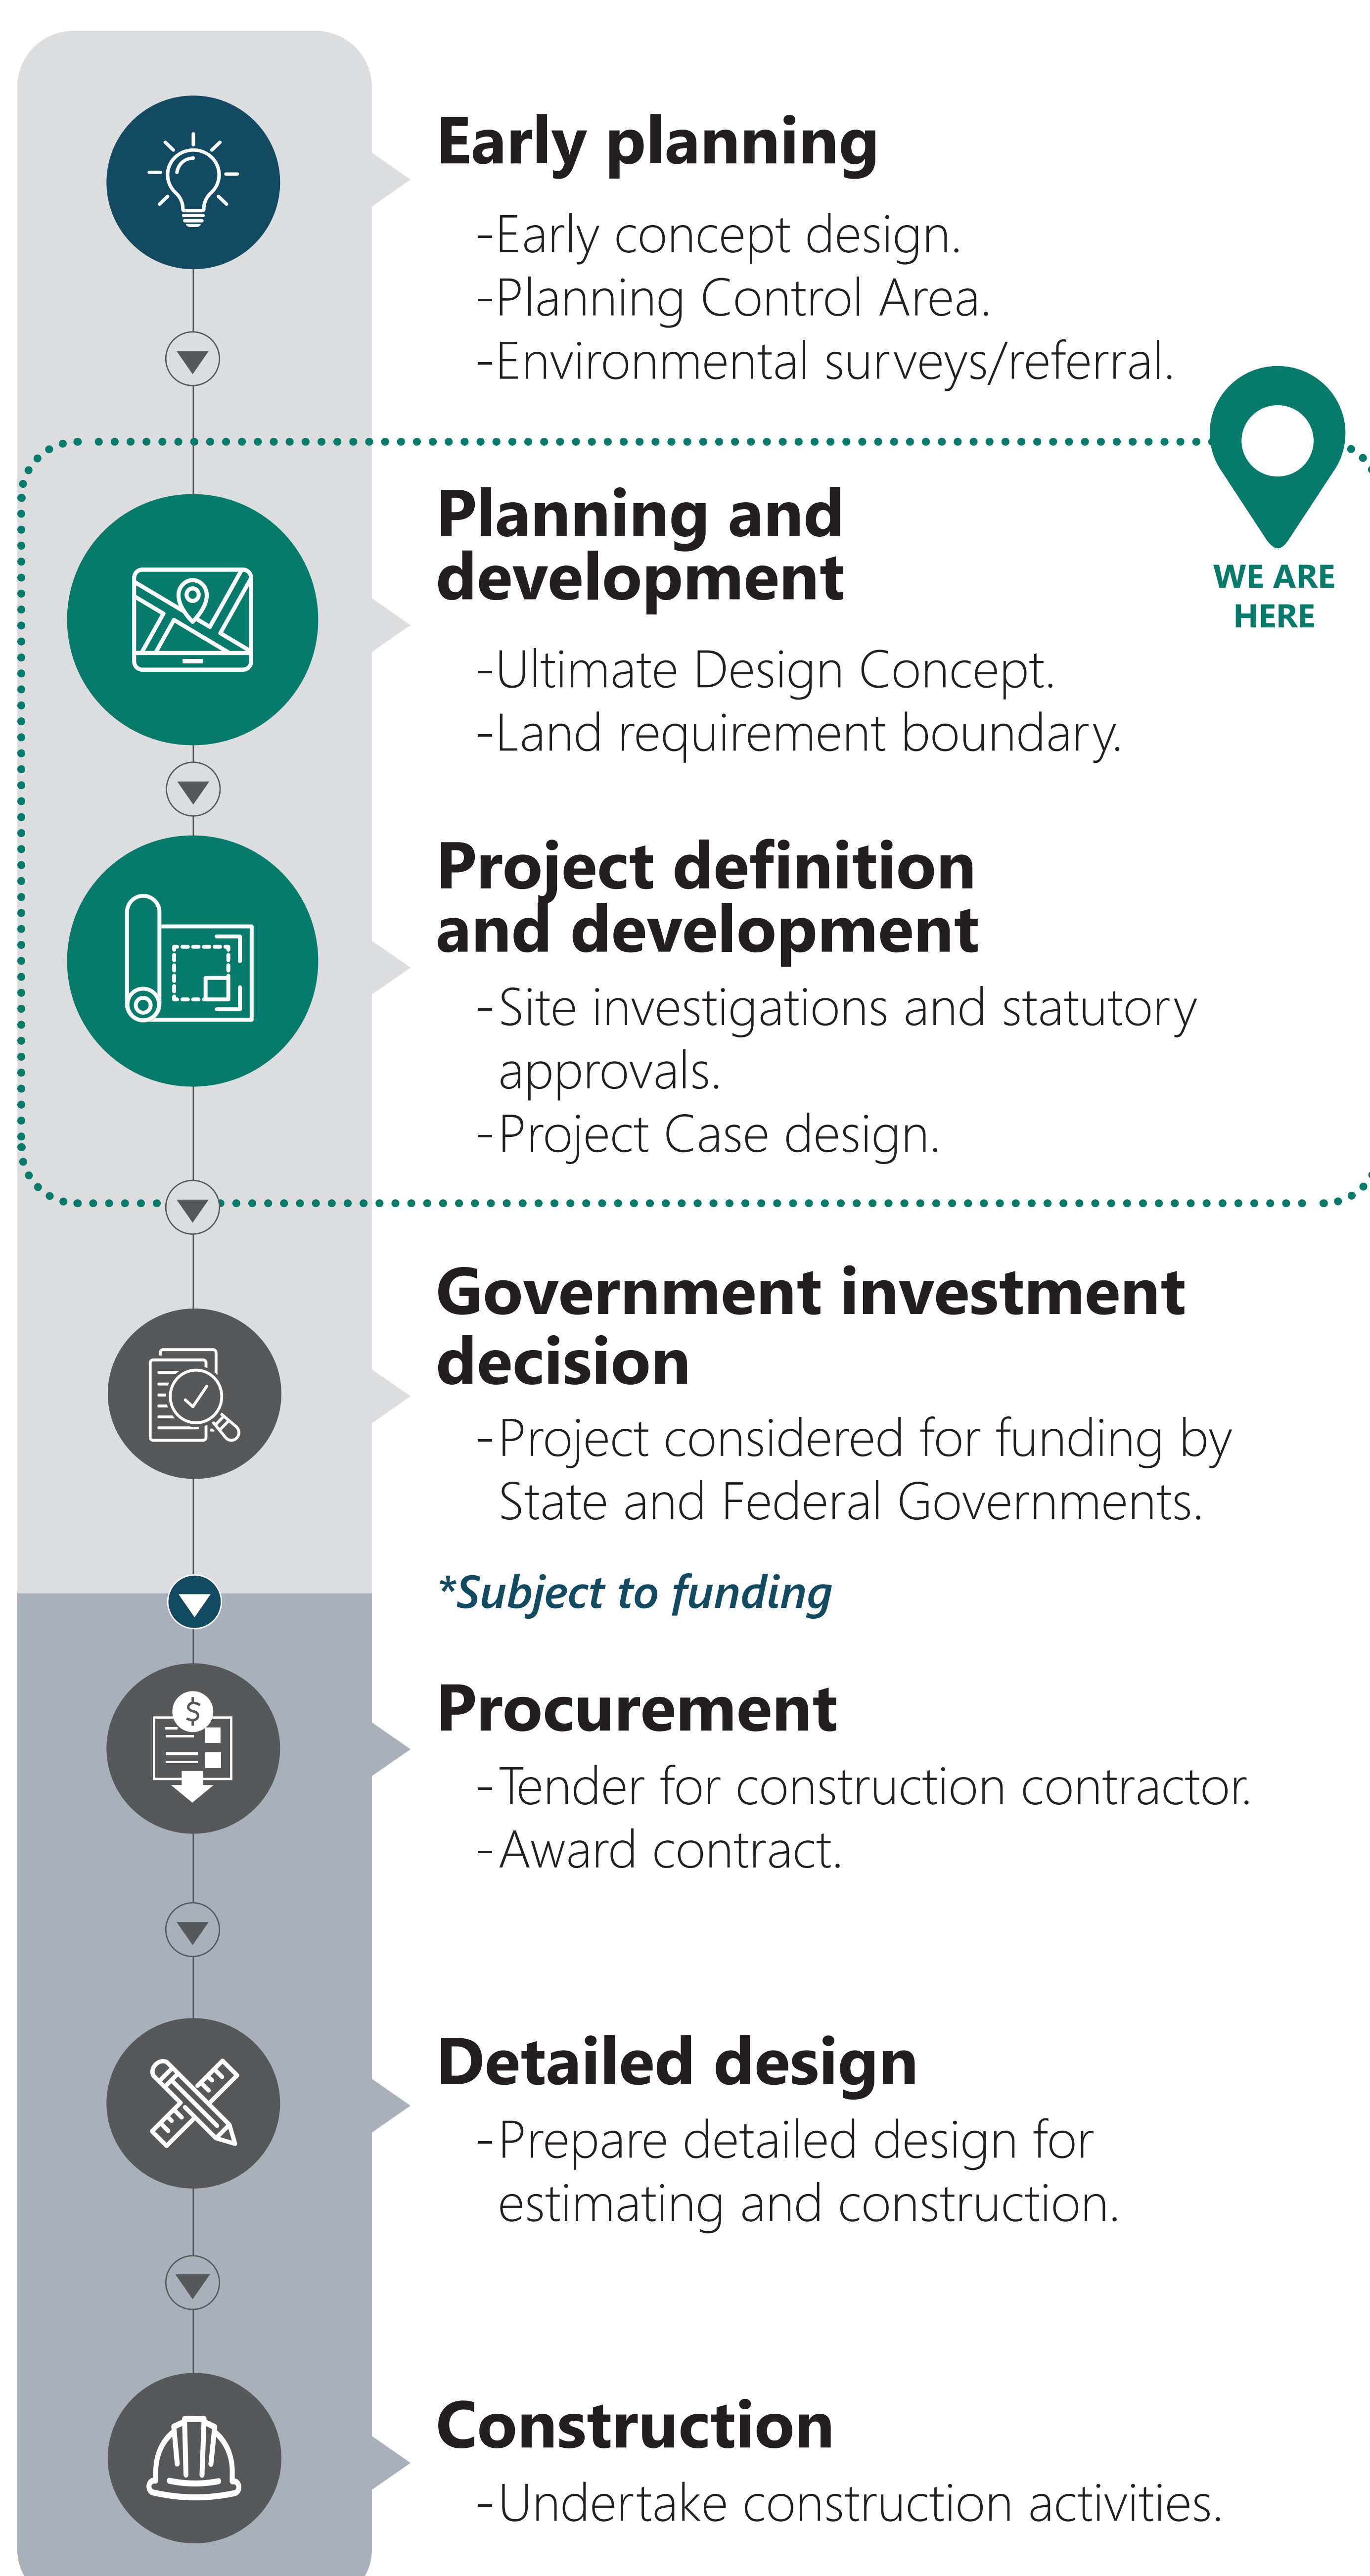

The upgrade of Anketell Road will form a key component of the future Anketell-Thomas Road Freight Corridor (ATRFC), the long-term plan for a strategic east-west freight link between Tonkin Highway in Oakford and Kwinana.

Planning and project development

A range of activities are undertaken during planning and project development to define the design and scope of the project.

Planning must balance a variety of factors to cater for our future growth and transport needs.

These factors include population growth, future traffic volumes, functionality requirements, environmental factors, and the aspirations of road users and communities that the corridor serves.

Planning is currently focused on Anketell Road between Kwinana Freeway and Leath Road in Kwinana to:

- Provide a high-quality, safe, and efficient corridor.
- Improve access to the Kwinana Industrial Area and broader Western Trade Coast.
- Support the construction and operation of the planned Westport container terminal in Kwinana.
