1. Refer to switchboard footprint on ORG. NO. 200231-0066 for bolt spacing.

2. Top of slab shall be level with top of kerb. If no kerb, slab shall be flat and 10mm above road pavement.

3. Top of slab shall be a weed floated surface with a broomed finish parallel to the traffic direction (grooves 5mm deep with 20mm spacing).

4. Conduits are indicative only. Final location and direction shall be determined on site.

5. All conduits shall protrude above concrete pad a minimum of 25mm.

6. Cap end of conduit to prevent ingress of dirt and moisture.

7. Switchboard door shall open on opposite side to road.
