Amendments:

1. Dimensions, measurements in mm; grid is at 100 x 50 mm.
2. Colours: Black legend in yellow box.
3. All pavement markings to be long life thermoplastic on cold applied asphalt with glass beads for retroreflectivity. Long life Thermoplastic will be in accordance with AWA specification 600. If preformed Thermoplastic is used, the symbols and letters are routed out, bitumen layered and inset into the warning pavement marking.
4. Two-part cold applied plastic will be as per principal's method specification for the installation of long-life pavement markings. For School Zones, PCCS #600000 with 1-3mm size faced alumina or calcined bauxite aggregate for skid resistance.
5. Markings to be installed central to PSP lane.
