NOTES

1. Dimensions: Measurements in mm.
   Grid is 1:30 x 300.

2. All Pavement Marking to include reflective glass beads as per Specification 644.

3. Colour: Red annulus and bar, white bicycle.

4. All Pavement Markings to be long life thermoplastic or cold applied plastic with glass beads for retroreflectivity. Long life thermoplastic will be in accordance with MRWA Specification 644.
   If preformed thermoplastic is used the symbols and letters are routed out (not layered) and inserted into the regulatory pavement marking.
   Thermoplastic will consist of 1.5% antimony oxide as per the principal's method.
   N.B. Pavement Marking for the installation of intermitent pavement markings for school zones document.
   Pavement Marking for the installation of intermitent pavement markings for school zones document.
   Painted with a 1.2m x 0.6m size fused alumina or calcined bauxite aggregate for skid resistance.

5. Markings to be installed central to PSP lane.
