

## 60 metre Road Train Signage Specifications

A sign complying with the following specifications must be fitted to the rear of all 60 metre road trains:

- 1) The sign must be mounted on the rear of the vehicle combination adjacent to the “Road Train” warning sign.
- 2) The sign must be manufactured from sheet steel with a minimum thickness of 0.8 mm or another material of at least the same stiffness.
- 3) The sign must be the minimum dimensions depicted below.
- 4) The sign must have a black border.
- 5) The graphics and lettering must be the colour depicted below.
- 6) The lettering must be of the typeface specified below.
- 7) The sign must be coated in yellow retro-reflective material that complies with class 100 or 400 of AS1906.1 – 2017 Retroreflective Materials and Devices for Road Traffic Control Purposes – Retroreflective Sheeting.

Note: A vector file document of the sign is available on the PBS page on the Main Roads website.
