

Smart Freeway - Kwinana Northbound Overnight freeway closures from 12 January

Jointly funded by the Australian and State Governments, Perth's first Smart Freeway will be fully operational by mid-2020. It will increase road capacity, reduce stop-start conditions and improve journey times on Kwinana Freeway northbound, between Farrington Road and the Narrows Bridge.

Overnight freeway closures start 12 January 2020

To minimise inconvenience to road users, sections of the Kwinana Freeway **northbound only** (including on-ramps) will be **closed at night** between 10pm and 5am, from Sunday to Thursday, starting Sunday 12 January 2020. These overnight closures will allow for the safe installation of large overhead signs across all traffic lanes and reduce disruption associated with resurfacing works for the *Smart Freeway – Kwinana Northbound* project. The closures will only affect northbound traffic between Leach Highway and the Narrows Bridge.

Closure dates and times

The following Kwinana Freeway northbound closures are scheduled and illustrated *overleaf*:

- Sunday 12 January to Thursday 30 January*, **excluding Sunday 26 January for Australia Day Skyworks**, 10pm-5am: Canning Highway to Mill Point Road
- Sunday 2 February to Thursday 13 February*, 10pm-5am: Canning Highway to the Narrows Bridge
- Sunday 16 February to Thursday 20 February*, 11pm-5am: Leach Highway to Manning Road

Signed detours will be in place at all times. Please plan ahead and allow extra time for your journey.

The freeway will be open on Friday and Saturday nights, although lane closures may be in place at times.

* These dates are subject to change. To view detour maps, check for updated information about these closures or find out more about the *Smart Freeway – Kwinana Northbound* project, visit
