Question 1

Introduction:

A multidisciplinary team from Tonkin Gap Alliance (TGA) participated in a sustainability workshop to map the importance of the [United Nations Sustainable Development Goals](#) (SDGs) to Tonkin Gap and Associated Works (the project). The SDGs were prioritised with respect to the level of influence the project has to meet these goals.

Provided is a summary of the 17 SDGs, what they relate to, how Australia is tracking, what Main Roads are doing, and how it could relate to the project. The final column on the right shows the importance of each SDG to the project.

Question:

After reviewing the provided SDG Summary, do you agree that the importance of the SDGs has been allocated the appropriate level in relation to the project?

Answer options:

No

Yes

If no, please provide further information regarding the importance of the SDGs that you consider to not be at the appropriate level.

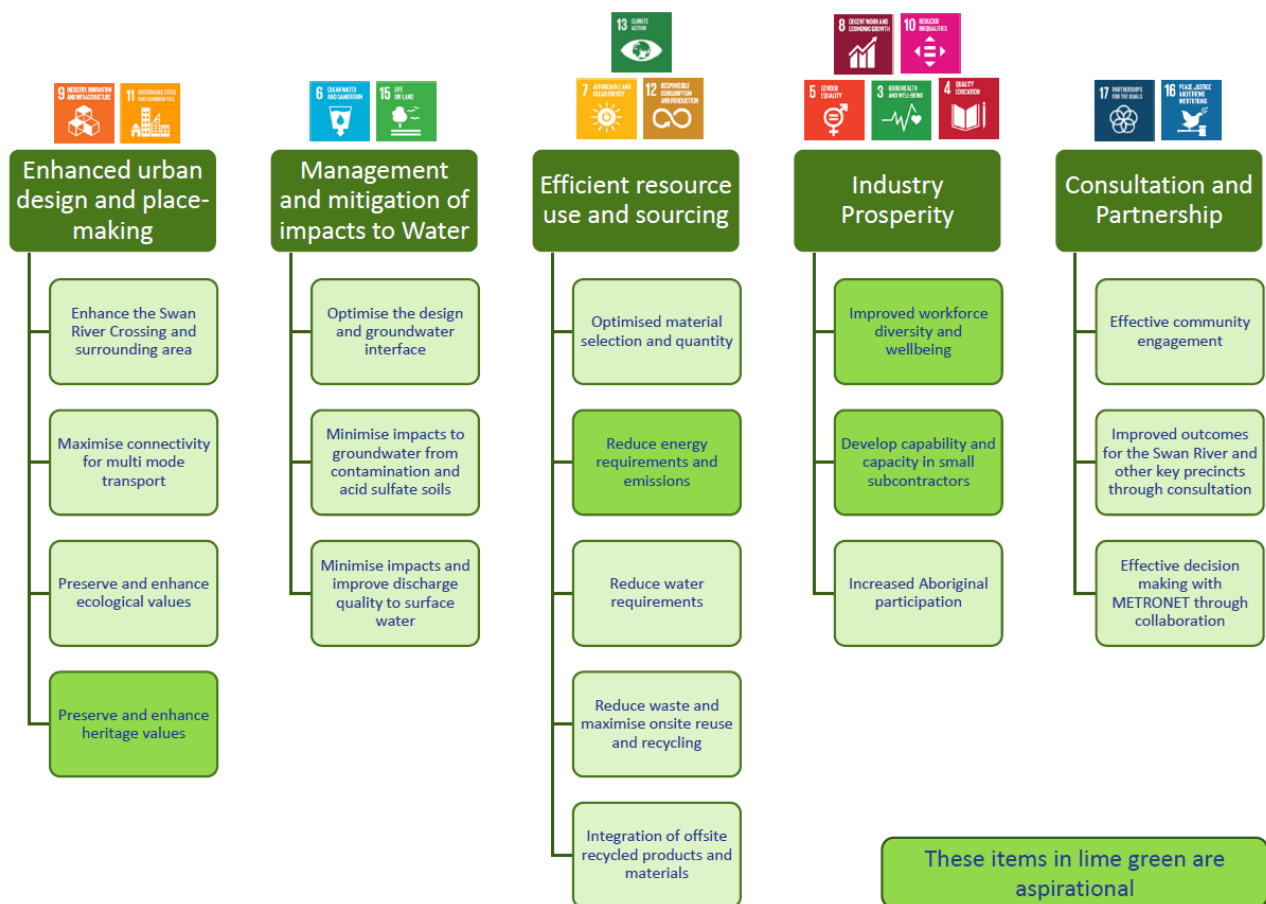

Question 2

Introduction:

During the same workshop, the TGA team also identified the key focus areas for the project. These focus areas have informed our sustainability objectives and targets. The focus areas are represented by the dark green boxes with white text, and comprise several sub-focus areas, which have become our objectives, represented by the white boxes with blue text. Some objectives are, due to their complex and multidisciplinary nature.

The focus areas have been aligned to the SDGs that were identified as relevant to the project, and these can be seen above the five focus areas.

Sustainability Focus Areas

Question:

Are there any other key focus areas, sub focus areas, or issues that have not been considered for the project and that we are able to influence?

Answer options:

No

Yes

If yes, please describe what the additional focus or sub-focus areas are that you consider important for the project.

Question 3

Introduction:

Infrastructure Sustainability is an important aspect for the delivery of this project, and we are striving to maximise local economic, social, and environmental outcomes through design and construction for long term benefit. Part of this process includes identifying sustainability opportunities for the project.

Question:

Are there any sustainability opportunities which the project should be implementing?

Answer options:

No

Yes

If yes, please provide further details regarding the opportunity. Please also include any ideas for implementation that you might have.

Question 4

Introduction:

Infrastructure Sustainability is an important aspect for the delivery of this project, and we are striving to maximise local economic, social, and environmental outcomes through design and construction for long term benefit. Another important part of this process includes identifying sustainability risks for the project.

Question:

Are there any sustainability risks which the project should be mitigating?

Answer options:

No

Yes

If yes, please provide further details regarding the risk. Please also include any ideas for implementation that you might have.
