

Toodyay Road Upgrade Dryandra Road to Toodyay

Notice of services relocation works; blasting activity approaching completion

From the week commencing 23 January 2023 through to the end of June, some telecommunication and electrical services will be relocated in various locations between Lovers Lane and Clackline-Toodyay Road.

This will involve Telstra and Western Power crews working in proximity to Toodyay Road. Light vehicles and some machinery will be visible from the road.

Intermittent speed reductions will be in place on sections of the road where a safe distance between the workforce and the carriageways cannot be maintained. Road users are requested to drive with care and adhere to the signage provided. Additional temporary traffic management measures may also be required on occasions over this period and will be communicated to the community once confirmed.

Creating the new corridors for telecommunications and power services will necessitate some minor vegetation removal along cadastral boundaries and around the new power pole locations to provide the access and safety clearances required by the service providers.

All clearing will be undertaken in accordance with relevant environmental approvals and will be strictly limited to areas required for the new services corridor.

Remaining vegetation removal in these locations will be undertaken prior to road construction, which is provisionally scheduled to begin during the second half of the year.

Blasting activity approaching completion

We thank road users and local landowners for their ongoing patience and cooperation while we complete blasting activity to remove the rock outcrop adjacent to Coorinja Winery.

We recently revised our traffic management procedures and wait times during blasting are currently between 10 and 15 minutes per day.

It is likely the rock outcrop will be fully removed by the end of January, enabling road construction to commence. This section of the Toodyay Road Upgrade remains on track for completion in April.
