WESTERN AUSTRALIAN STATE ROUTES 2024

*We're working for
Western Australia.*

**The attached maps show the
State Routes
within Western Australia as
reviewed and amended at
April 2024.**

Ron Tolliday
Project Manager Road Classification
Road Planning Branch

OVERVIEW

The State Road Routes within Western Australia assist drivers navigating roads in urban and rural areas of the State. Each route has a unique number allocated by Main Roads W.A. Routes are denoted on directional signs and roadside poles to assist the road user in identifying the routes.

These are designated by a white number on a blue shield.

Two-digit numbers ending in zero are the major routes out of Perth, except for Route 10, which designates rural highway connections in the South West Region. Other routes numbered with two digits connect the urban centres of Perth, with three-digit numbers connecting regional and remote areas within the state.

Different web based information sites such as Google and Wikipedia etc show some differing depictions of some State Routes. A full review has been undertaken and the following State Routes are those to be used.

Please note any incorrect or missing shield signage will be corrected over time.
